

Table S1. Calibration curves of six compounds isolated from DCM fraction of WDC.

Compound	LinearRegression Equation^{a)}	Correlation coefficient (r^2)^{b)}	LOD ($\mu\text{g/mL}$)	LOQ ($\mu\text{g/mL}$)
1	$y = 0.0335x + 0.0388$	0.9999	0.564	1.879
2	$y = 0.032x + 0.0016$	0.9999	0.356	1.188
3	$y = 0.0652x - 0.0413$	0.9996	0.442	1.473
4	$y = 0.2686x - 0.2519$	0.9994	0.319	1.063
5	$y = 0.1507x - 0.1819$	0.9991	0.307	1.024
6	$y = 0.1034x - 0.2341$	0.9983	0.205	0.683

a) Y: peak area, x: concentration ($\mu\text{g/mL}$); b) Regression coefficient (n=6)
