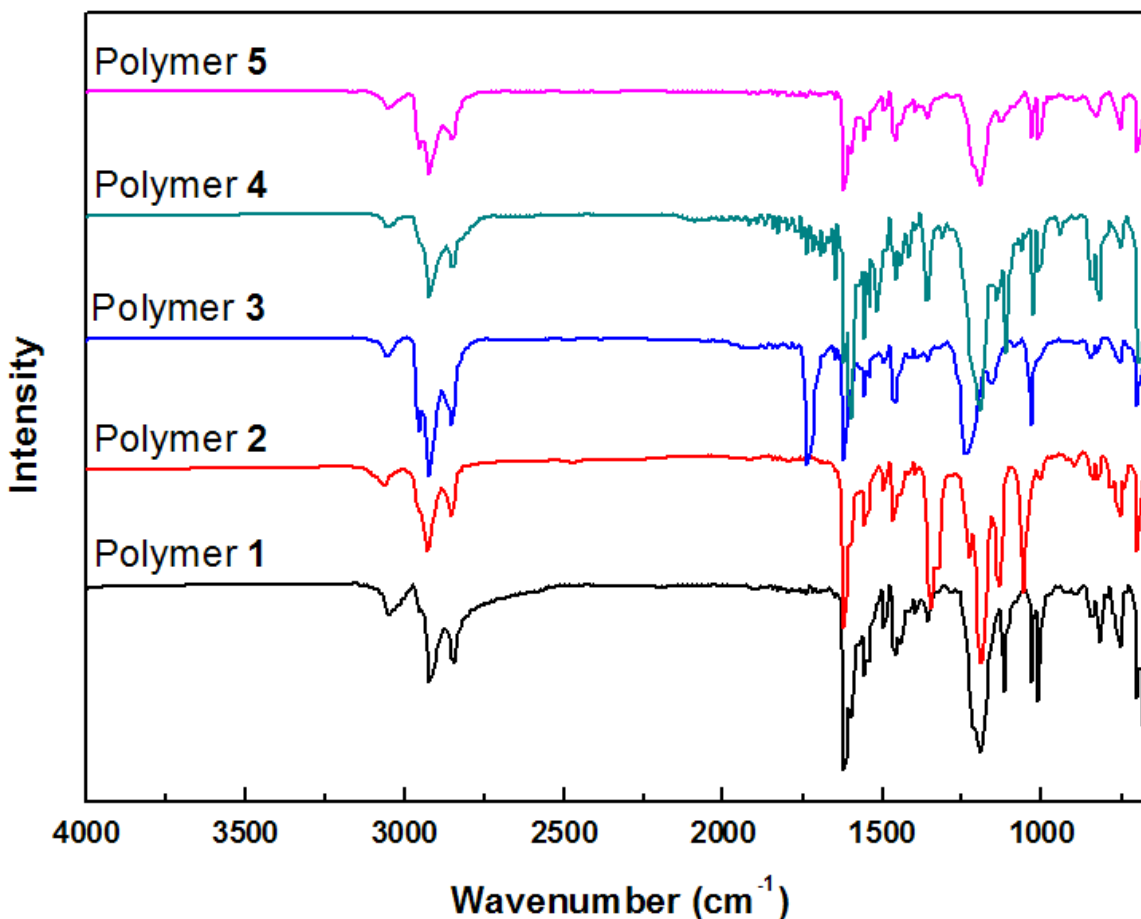

Figure S1. FTIR spectra of polymers 1–5 taken at room temperature.

Figure S2. ^{19}F NMR spectrum of polymer **2** in d_6 -DMSO at 25 °C.

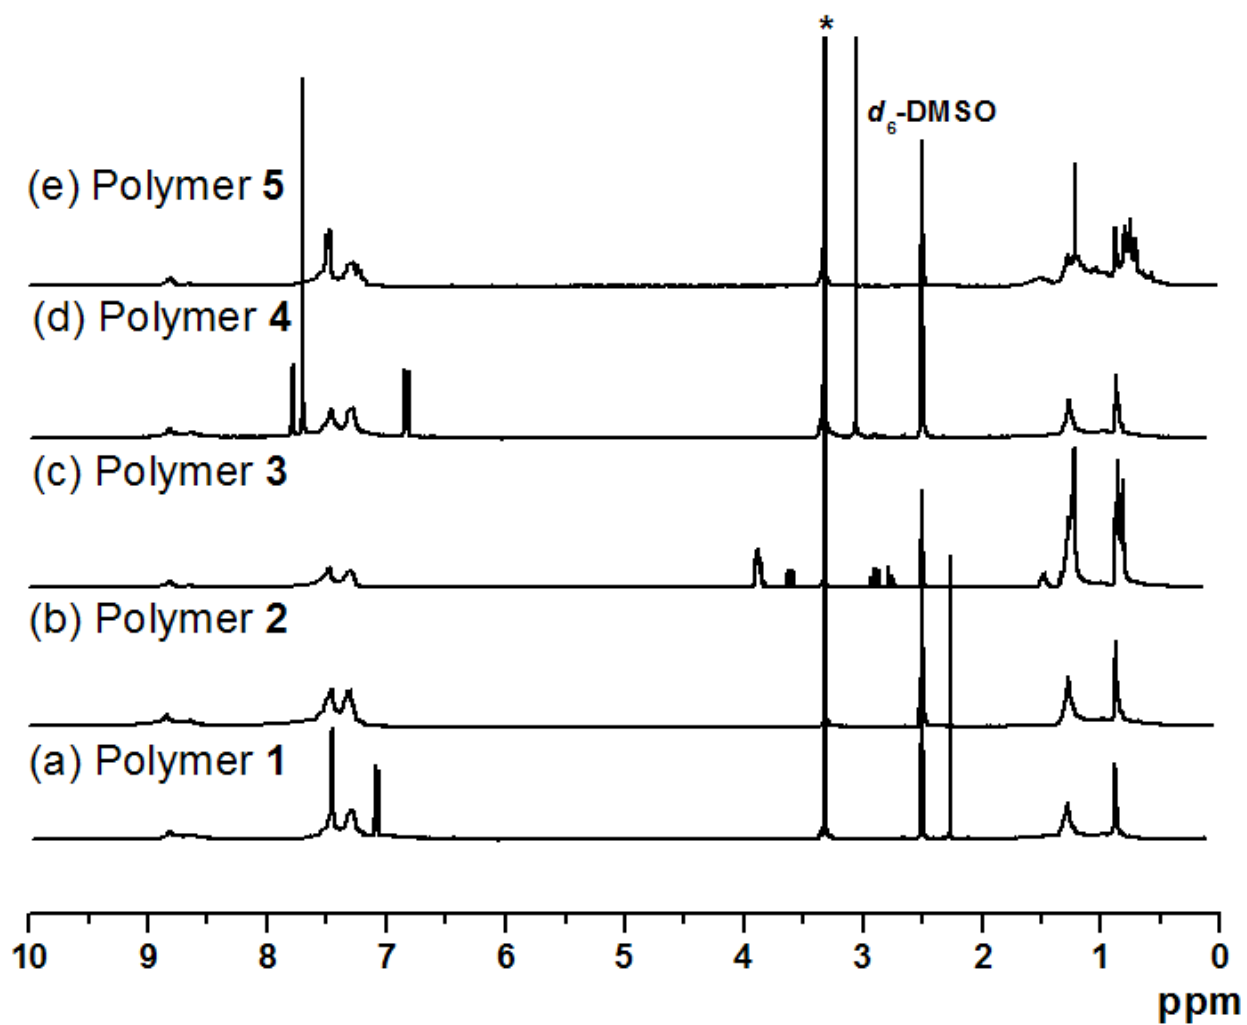

Figure S3. ¹H NMR spectra of polymers 1-5 [10 mg/mL in *d*₆-DMSO at 25 °C. An asterisk indicates H₂O from the NMR solvent).

Figure S4. Photomicrographs of (a) polymer 1 at 20 wt % in CH_3OH , (b) polymer 2 at 30 wt % in DMSO, (c) polymer 3 at 40 wt % in DMSO, and (d) polymer 4 at 35 wt % in DMSO under crossed polarizers exhibiting lyotropic LC phase, respectively, (magnification 400x).

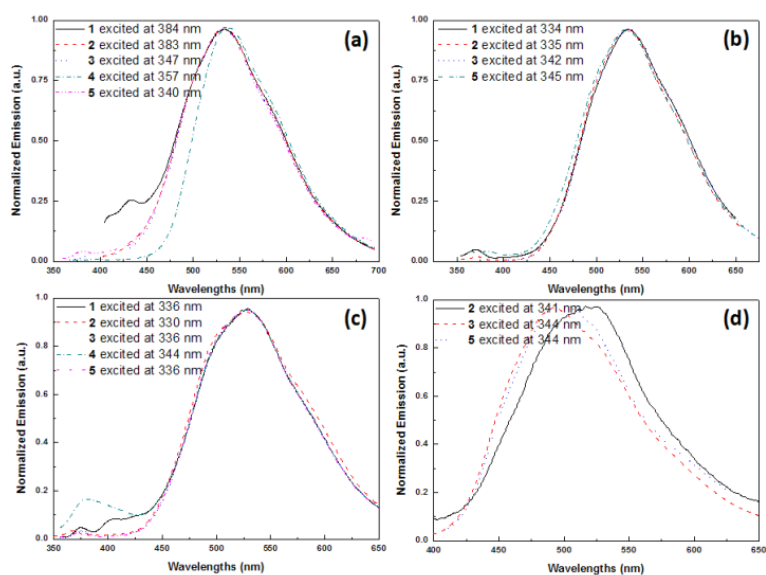

Figure S5. Emission spectra of polymers in (a) DMSO, (b) acetonitrile, (c) methanol, and (d) THF at various excitation wavelengths.

Figure S6. Emission spectra of as synthesized polymers (powdered state) 1-3, and 5 excited at 354, 360, 355 and 352 nm, respectively.

Figure S7. Photomicrographs of polymers **1, 2, 3** and **5** in thin film states under regular light and UV light.

Figure S8. Photomicrographs of synthesized polymers **1-5** (powdered form) under regular light and UV light.

Figure S9. Emission spectra of polymer **1** (1 μM repeating units, excited at 339 nm) in DMSO/H₂O mixtures with varying amounts water % (v/v).

Figure S10. Emission spectra of polymer **1** (1 μM repeating units, excited at 343 nm) in CH₃OH/H₂O mixtures with varying amounts water % (v/v).

Figure S11. Emission spectra of polymer **2** (1 μ M repeating units, excited at 342 nm) in CH₃CN/H₂O mixtures with varying amounts water % (v/v).

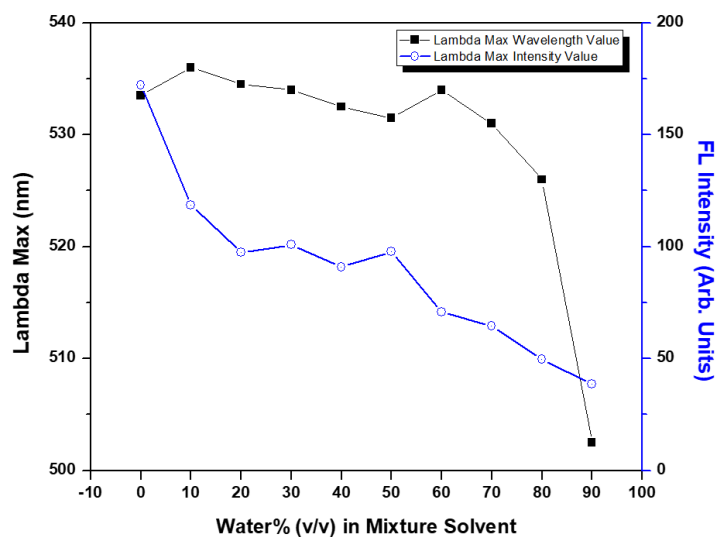

Figure S12. Fluorescence intensity and emission peak of polymer **2** as a function of water content in CH₃CN (1 μ M repeating units, λ_{ex} at 342).

Figure S13. Emission spectra of polymer **5** (1 μM repeating units, excited at 336 nm) in $\text{CH}_3\text{OH}/\text{H}_2\text{O}$ mixtures with varying amounts water % (v/v).

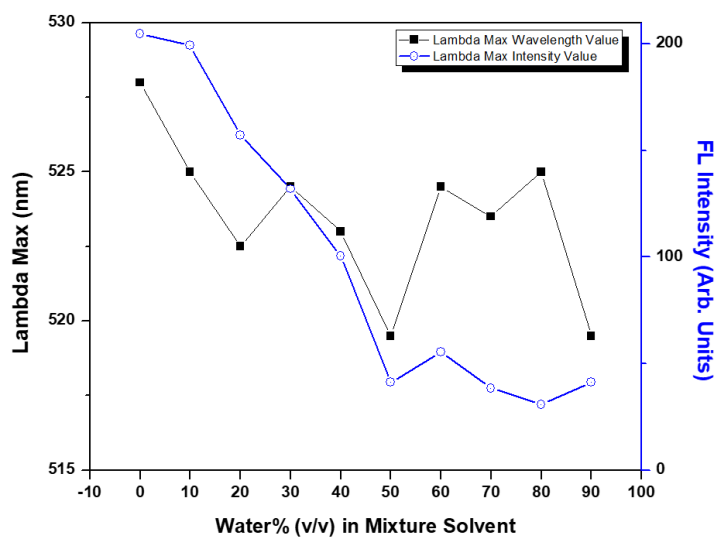

Figure S14. Fluorescence intensity and emission peak of polymer **5** as a function of water content in CH_3OH (1 μM repeating units, λ_{ex} at 336 nm).
