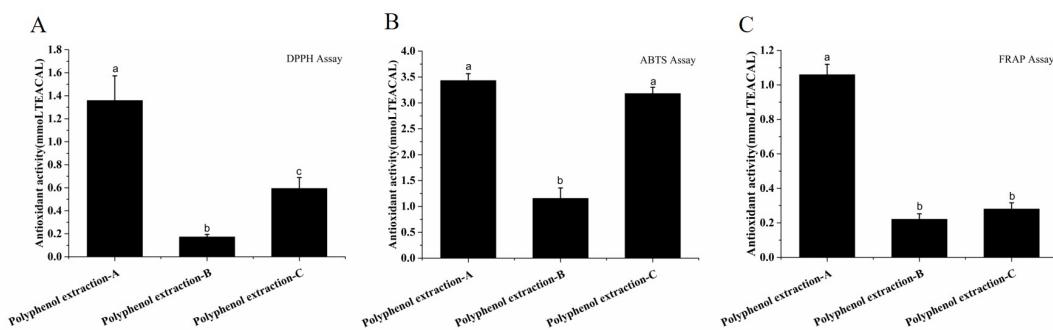

Figure S1. Evaluation of antioxidant activity of polyphenol extracts. (A) DPPH method. (B) ABTS method. (C) FRAP method. Data represent the mean \pm SD ($n = 6$). Values in the same row with different letters are significantly different ($P < 0.05$).

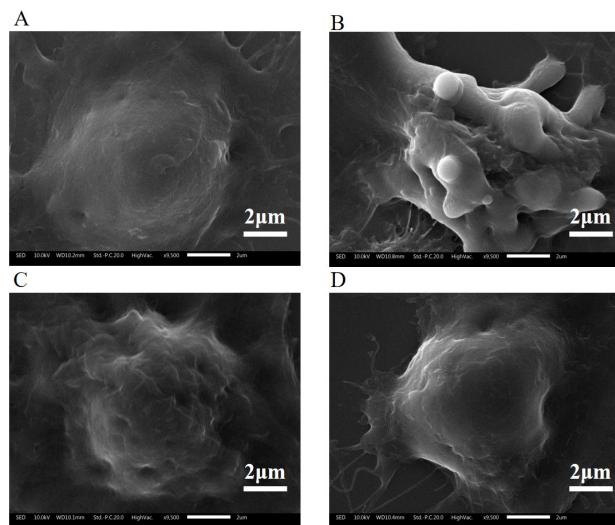

Figure S2. Effects of SAVEP on RAW264.7 cell morphology of LPS-induced inflammatory injury with SEM (9500 \times). (A) Vehicle group (B) Model group (C) LD group (D) HD group.

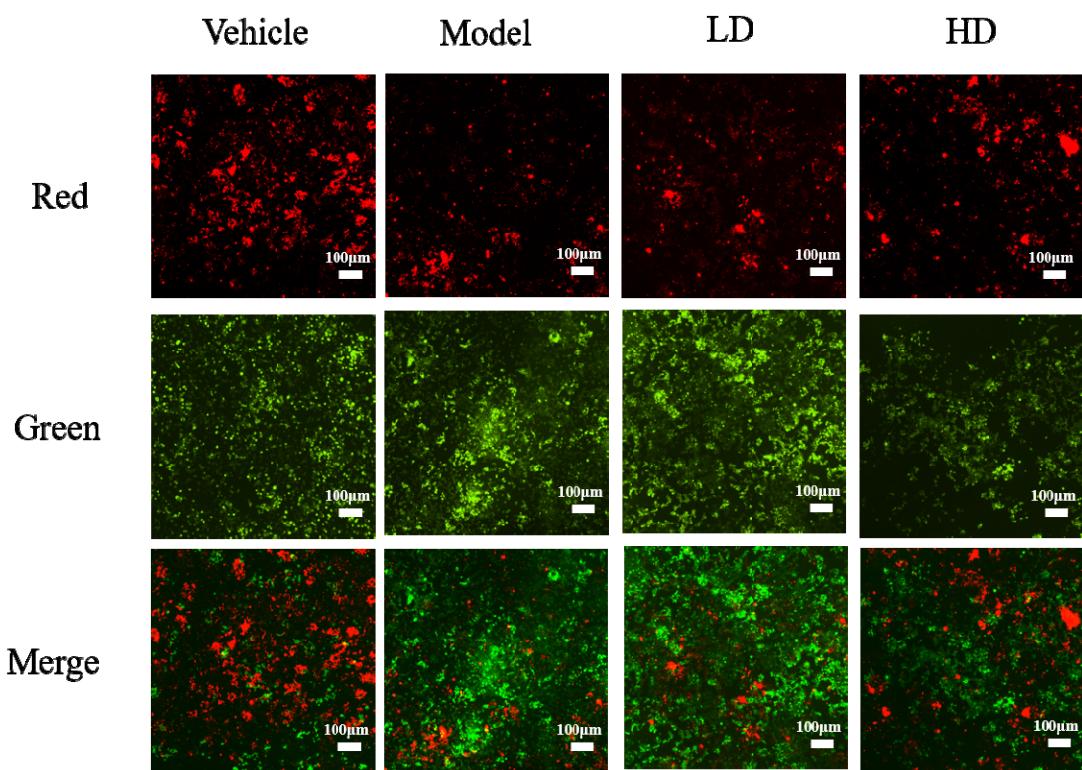

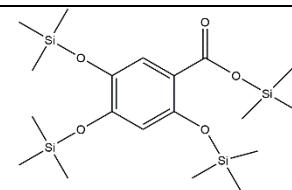

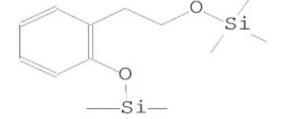

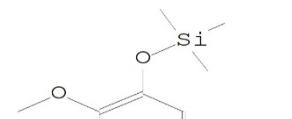

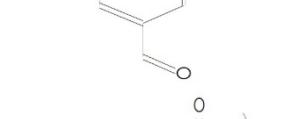

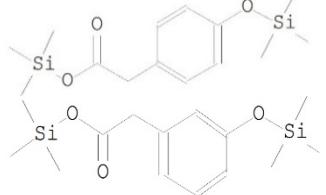

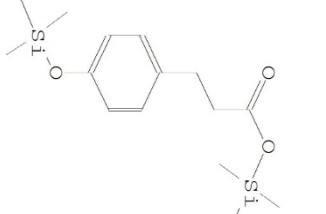

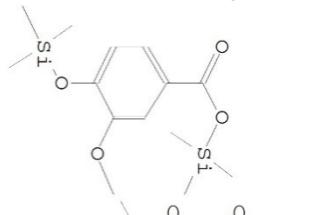

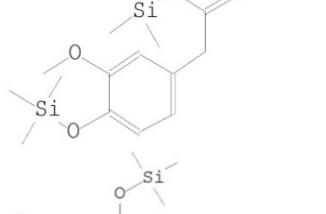

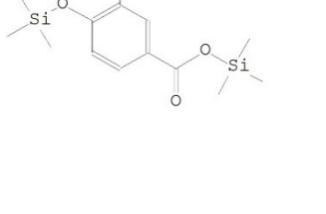

Figure S3. Fluorescence intensity observed by fluorescence microscope. A larger version of Figure 4A

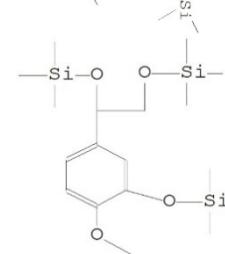

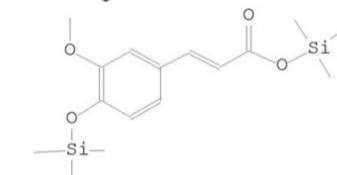

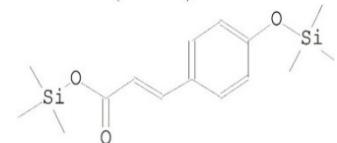

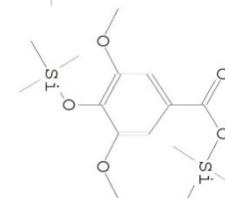

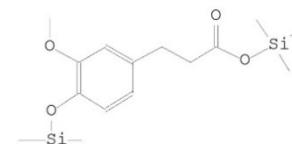

Name is the name of polyphenol derivatives, and Structure is the structure of polyphenol.
