## Figures:

**Figure S1.** Time-dependent and temperature-dependent uptake of M8 following incubation of Y101 (2.0  $\mu$ M) in kidney slices. The concentration of PRO was 100  $\mu$ M. (\*,  $p < 0.05$ ; \*\*,  $p < 0.01$ ). Data are expressed as mean  $\pm$  SD,  $n = 3$ .
