

Supplementary Materials

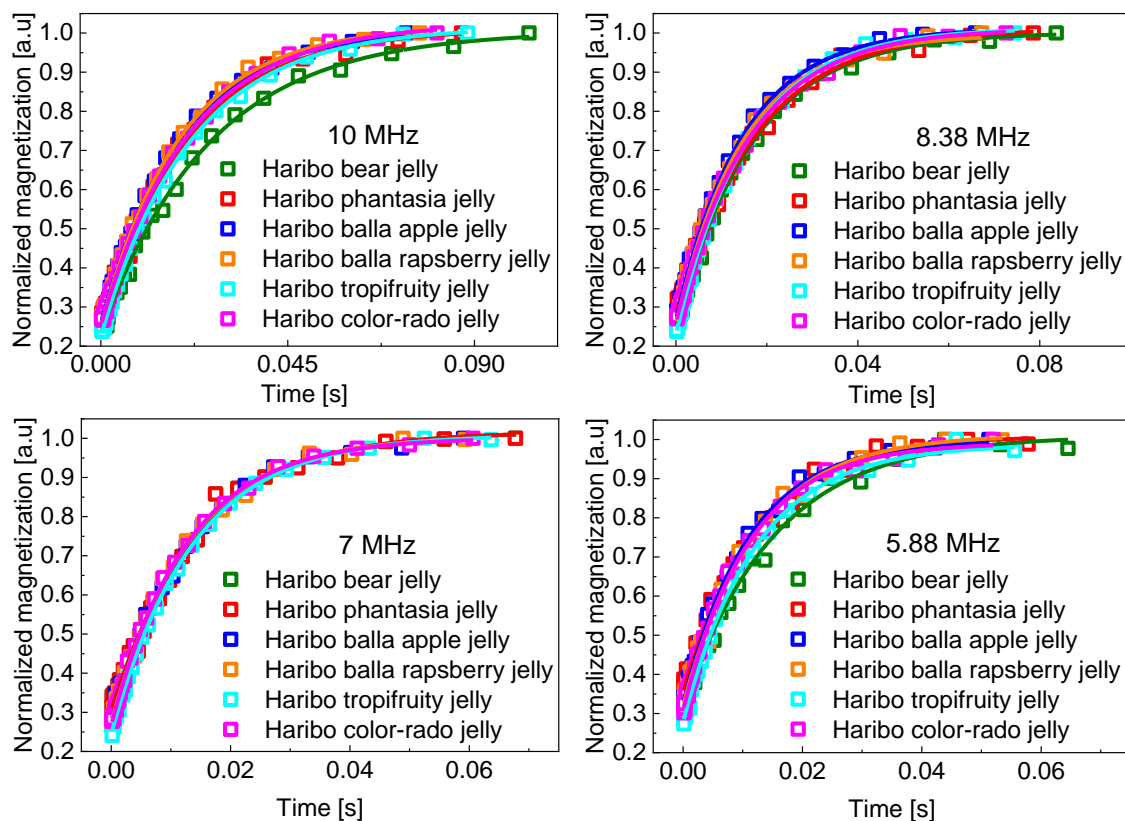

Figure. S1. Example of ^1H magnetisation curves for different kinds of Haribo jelly at 298 K; solid lines – single exponential fits.

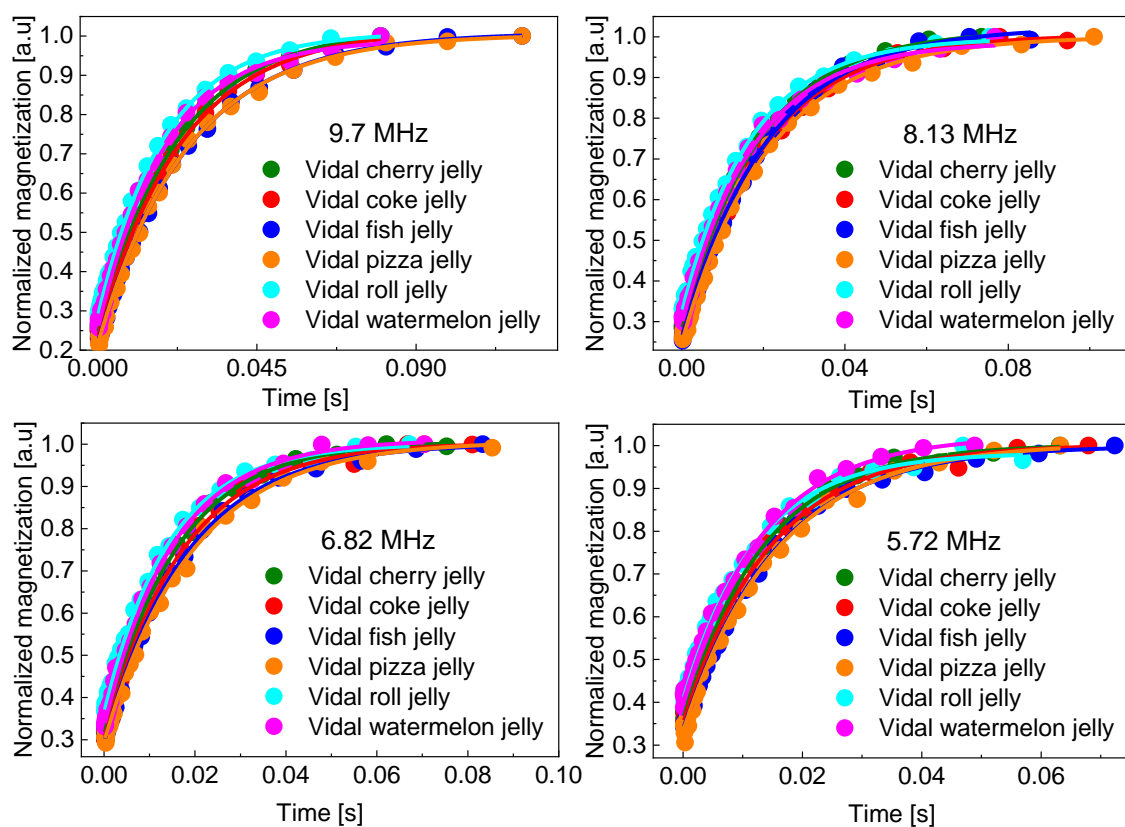

Figure. S2. Example of ^1H magnetisation curves for different kinds of Vidal jelly at 323°K; solid lines – single exponential fits.

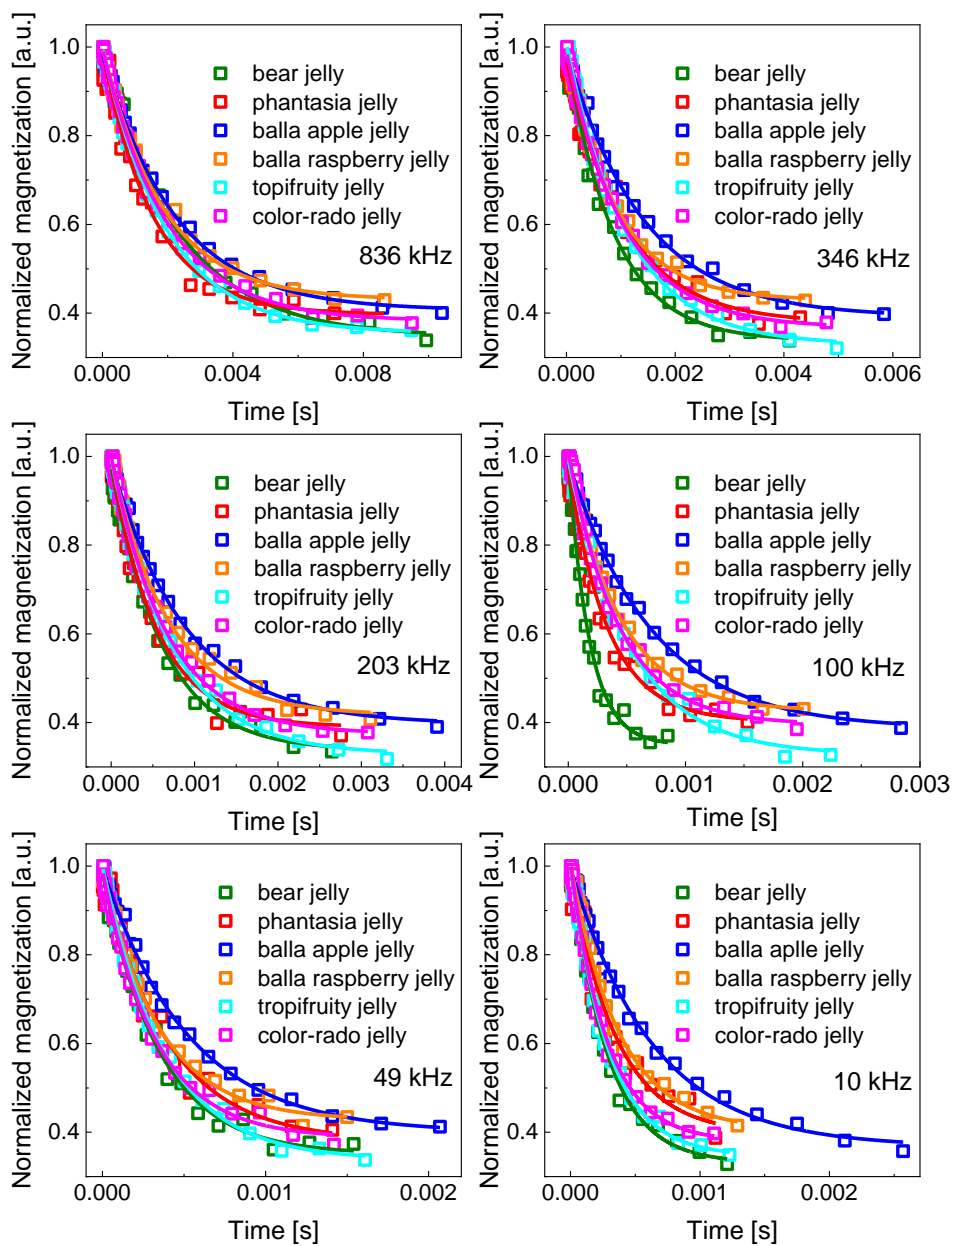

Figure S3. Example of ^1H magnetisation curves for different kinds of Haribo jelly at 298 K; solid lines – single exponential fits.

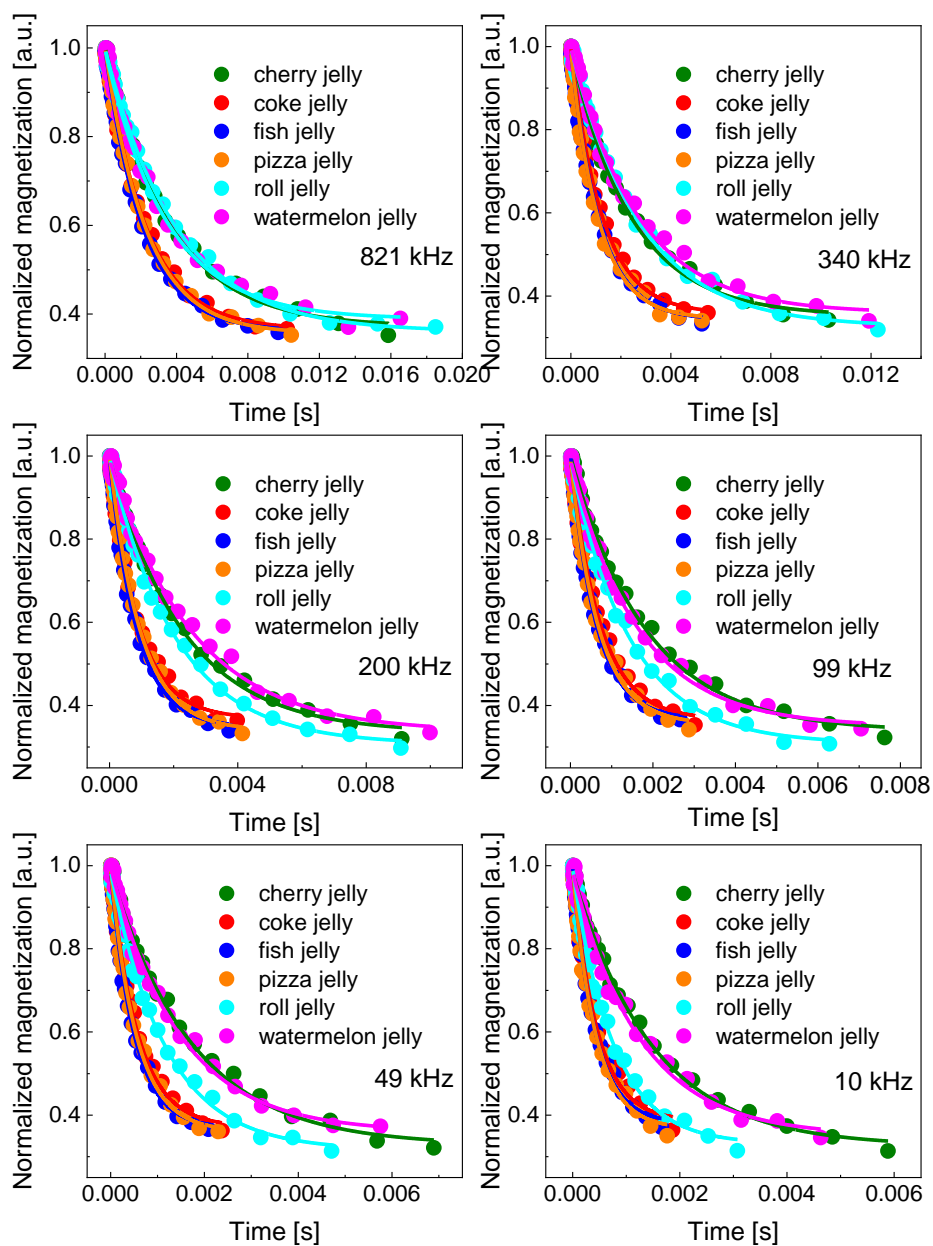

Figure S4. Example of ^1H magnetisation curves for different kinds of Vidal jelly at 323°K ; solid lines – single exponential fits.
