

## Supplementary Material for Manuscript

### Exploring quinazoline nitro-derivatives as potential antichagasic agents: Synthesis and *in vitro* evaluation

Citlali Vázquez 1#, Audifás Salvador Matus-Meza 2#, Oswaldo Nuñez-Moreno 1, Brenda Michelle Barbosa-Sánchez 2, Víctor Manuel Farías-Gutiérrez 2, Mariana Mendoza-Conde 1, Francisco Hernández-Luis 2\* and Emma Saavedra1\*

## Supplementary Figure S1

**Fig. S1. Effect of TAQ-derivatives 6-7 and 12-14 on the growth of epimastigotes after 24 h treatment.** Compound 12 had a high ED<sub>50</sub> of 30 μM, so further investigation was discarded.
