

Figure S1. The SE of the expression of *c-MET* at pH 6.5. *c-MET* expression was normalised for *TBP* or *ACTB* or for the geometric average of *YWHAZ*, *GUSB*, *GAPDH* and *18S rRNA*. $p < 0.05$ for both *ACTB* or *TBP* vs the geometric mean of the 4 selected HKG, $n = 3$.
