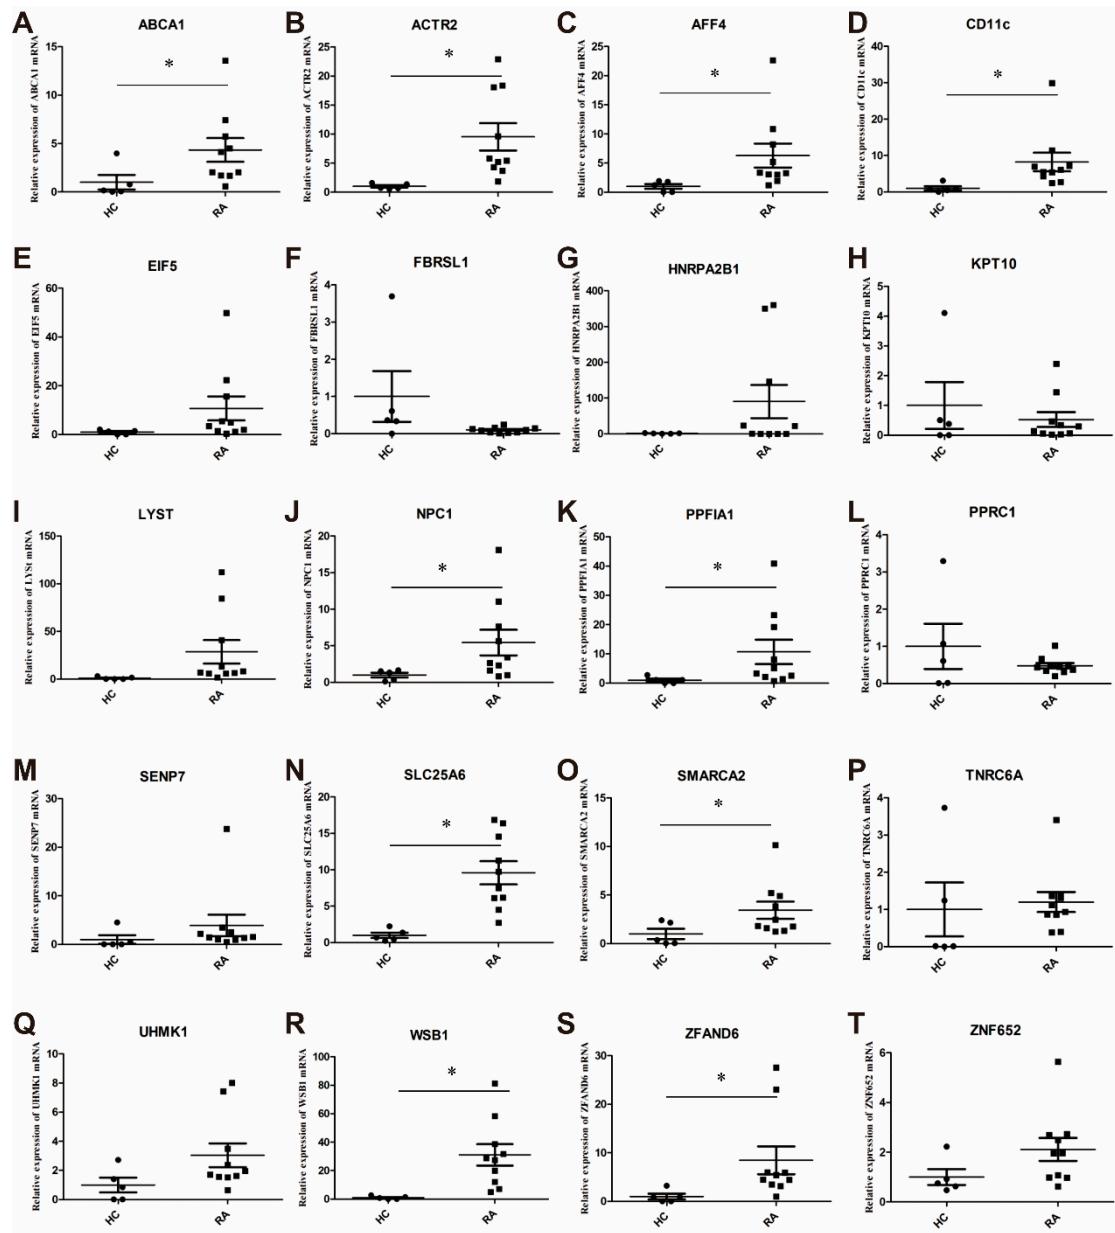

Figure S1. The mRNA expression levels between RA patients and with health control (HC) in pilot study. Value are the mean \pm SEM. * $p < 0.05$.

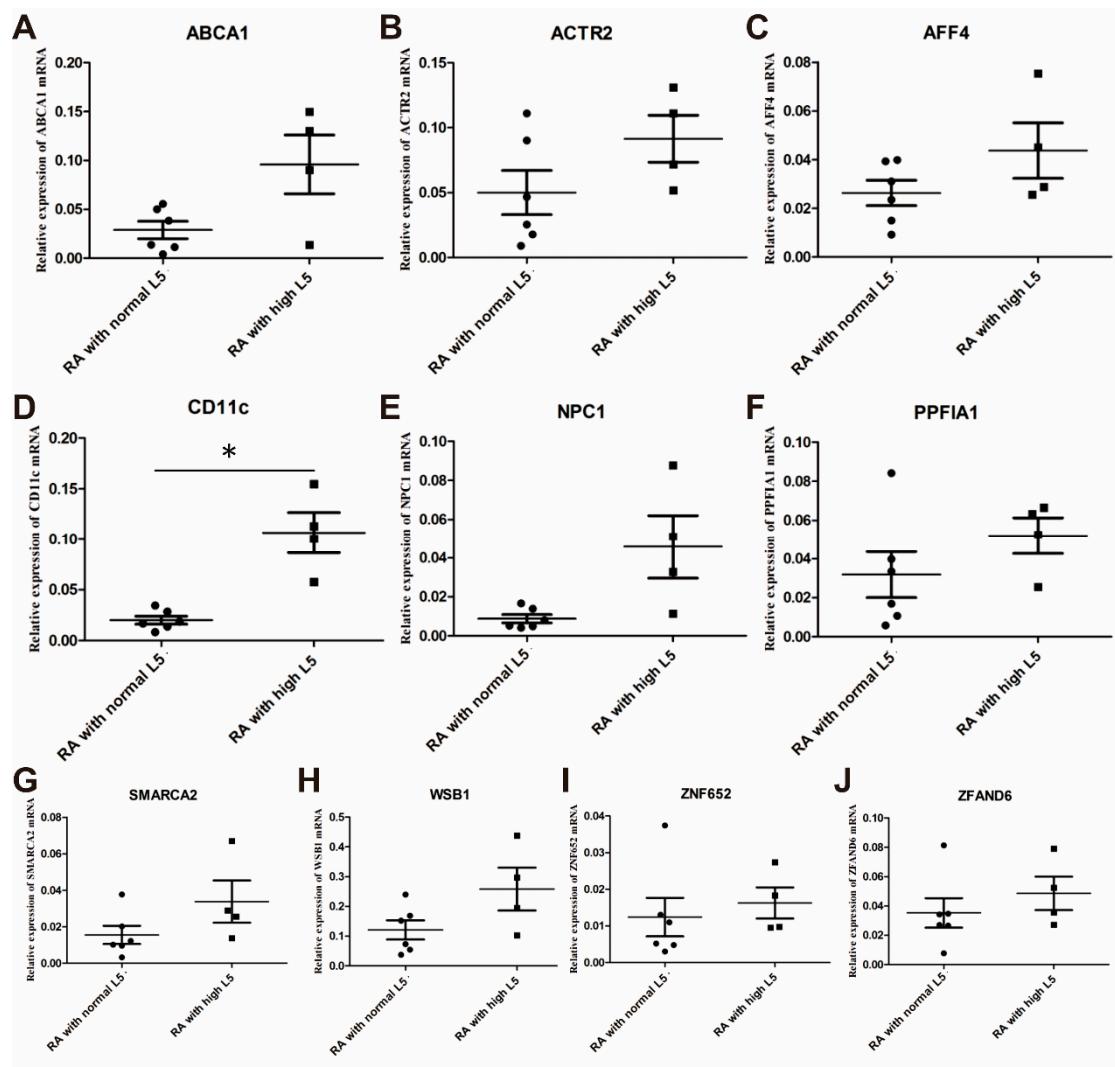

Figure S2. The mRNA expression levels between RA patients with high L5% and with normal L5% in pilot study. Value are the mean \pm SEM. * $p<0.05$.

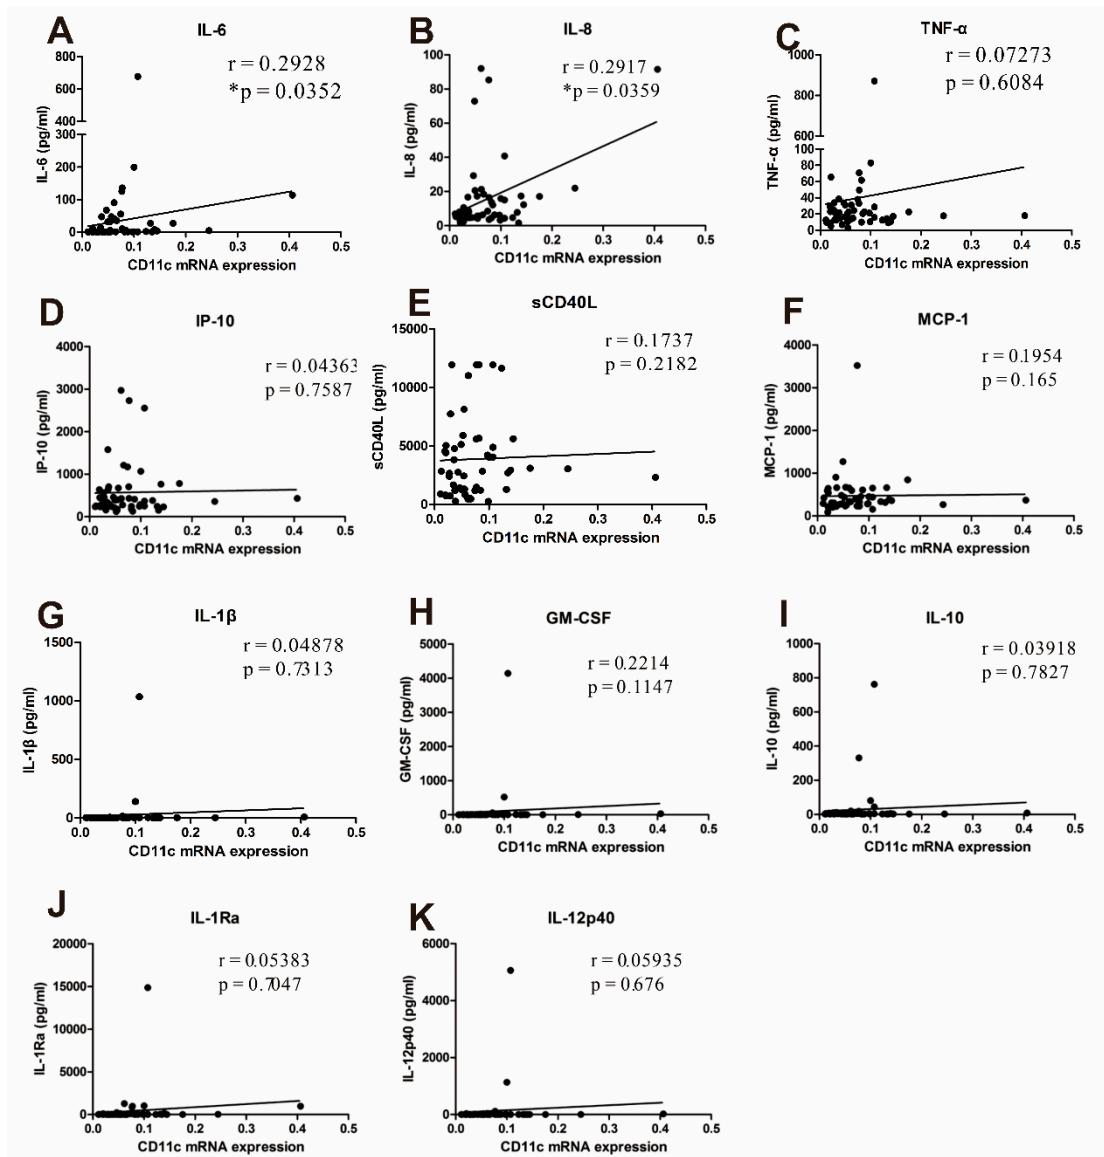

Figure S3. Correlation between the CD11c expression and plasma levels of inflammatory mediators in RA patients. The correlation coefficient was calculated using the nonparametric Spearman's rank correlation test. * $p < 0.05$.
