Supporting Information:

Table S1: Statistical significance of chitosan pretreatment and filtration as compared to filtration only for Chitosan Acetate and Chitosan Lactate 30 mg/L doses in a natural surface water amended with 1% sewage

Table S2: Physical and chemical water quality parameters for October through January surface waters collected from University Lake, Carrboro, NC.

Table S3: *E. coli* KO11 log reductions for surface water with chitosan pretreatment and ceramic filtration (CWF), control filter, and control and pre-chitosan experimental influent concentrations.

Table S4: MS2 Coliphage log reductions for surface water with chitosan pretreatment and ceramic filtration (CWF), control filter, and control and pre-chitosan experimental influent concentrations.

Table S5: Turbidity (NTU) reductions for surface water with chitosan pretreatment and ceramic filtration (CWF), control filter, and control and pre-chitosan experimental influent.

Table S6: Microbial log reductions for test waters pretreated with chitosan prior to filtration. Samples were taken from the middle of the water column 30 minutes after chitosan coagulation-flocculation and before test water was passed through CWF.

Figure S1: Ceramic disc molding apparatus consisting of a hydraulic press and aluminum disc mold for the formation of ceramic filter discs

Table S1: Statistical significance of chitosan pretreatment and filtration as compared to filtration only for Chitosan Acetate and Chitosan Lactate 30 mg/L doses in a natural surface water amended with 1% sewage

Test	Comparison	Organism	Sum of Ranks	p-value	Number of Samples (N)
Mann-Whitney U	Natural Water +1% Sewage (30 mg/L Chitosan Acetate)	MS2 Coliphage	45	<0.0001	9
	Natural Water +1% Sewage (No Chitosan)		108		8
Mann-Whitney U	Natural Water +1% Sewage (30 mg/L Chitosan Acetate)	<i>C. perfringens</i>	48	0.0012	9
	Natural Water +1% Sewage (No Chitosan)		88		7
Mann-Whitney U	Natural Water +1% Sewage (30 mg/L Chitosan Acetate)	<i>E. coli</i>	28	0.0003	7
	Natural Water +1% Sewage (No Chitosan)		92		8
Mann-Whitney U	Natural Water +1% Sewage (30 mg/L Chitosan Lactate)	MS2 Coliphage	45	<0.0001	8
	Natural Water +1% Sewage (No Chitosan)		108		9
Mann-Whitney U	Natural Water +1% Sewage (30 mg/L Chitosan Lactate)	<i>C. perfringens</i>	51	0.0052	9
	Natural Water +1% Sewage (No Chitosan)		85		7
Mann-Whitney U	Natural Water +1% Sewage (30 mg/L Chitosan Lactate)	<i>E. coli</i>	21	0.0007	6
	Natural Water +1% Sewage (No Chitosan)		84		8

Table S2: Physical and chemical water quality parameters for October through January surface waters collected from University Lake, Carrboro, NC.

Parameter	Average± Std. Dev	Unit	Sample #
Turbidity	25.49±10.35	NTU	n = 9
pH	7.35±0.28	--	n = 9
Orthophosphate as Phosphorus	<0.10±0.00	mg/L	n = 14
UV Absorbance at 254 nm	0.12±0.03	cm-1	n = 8
Dissolved Organic Carbon	4.80±0.28	mg/L	n = 8
Total Organic Carbon	5.93±0.37	mg/L	n = 15
<i>E. coli</i>	26.34±49.59	MPN/100 mL	n = 62
Total Coliform	1596.03±2020.16	MPN/100 mL	n = 62

Table S3: *E. coli* KO11 log reductions for surface water with chitosan pretreatment and ceramic filtration (CWF), control filter, and control and pre-chitosan experimental influent concentrations.

Influent/Effluent Assayed	Day 14	Day 27	Day 34	Day 43	Day 50	Day 56	Day 64	Day 71
