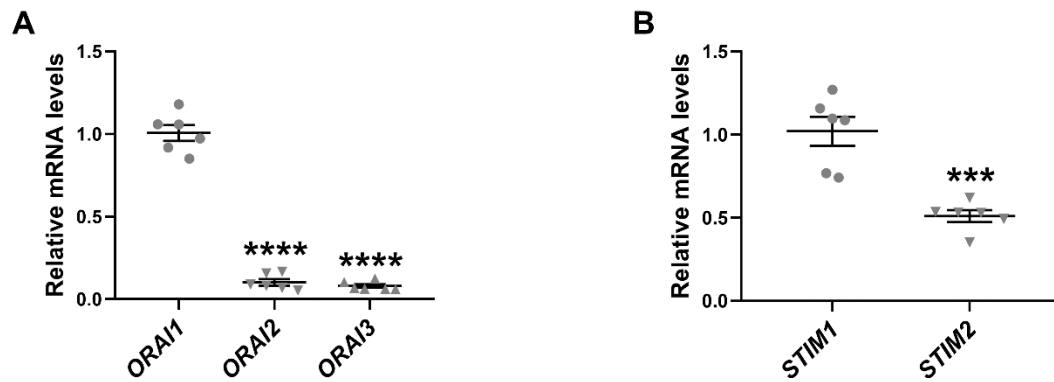

Figure S1. Relative transcription levels of *ORAI* and *STIM* isoforms in megakaryocytes. **A, B.** Arithmetic means (\pm SEM, $n = 6$) of *ORAI* (**A**) and *STIM* (**B**) isoforms mRNA expression under control conditions in megakaryocytes. The relative expression of *ORAI2* and *ORAI3* were normalized to *ORAI1* expression, while *STIM2* relative expression was normalized to *STIM1*. ***($p < 0.001$), ****($p < 0.0001$) indicates statistically significant difference to *ORAI1* or *STIM1* (ANOVA or Student's *t* test).
