

Supplementary Materials

Figure S1. Detection of apoE in ACM by SDS-PAGE/WB. ACM was obtained by collecting the astrocyte culture medium after 48 hours of growth. After filtration, the presence of apolipoprotein E (apoE) was evaluated by SDS-PAGE/WB.

Figure S2. Detection of SRB-1 in hCMEC/D3 by SDS-PAGE/WB. Cells were lysed and the presence of SR-B1 receptor was evaluated by SDS-PAGE/WB.
