

Figure S1.

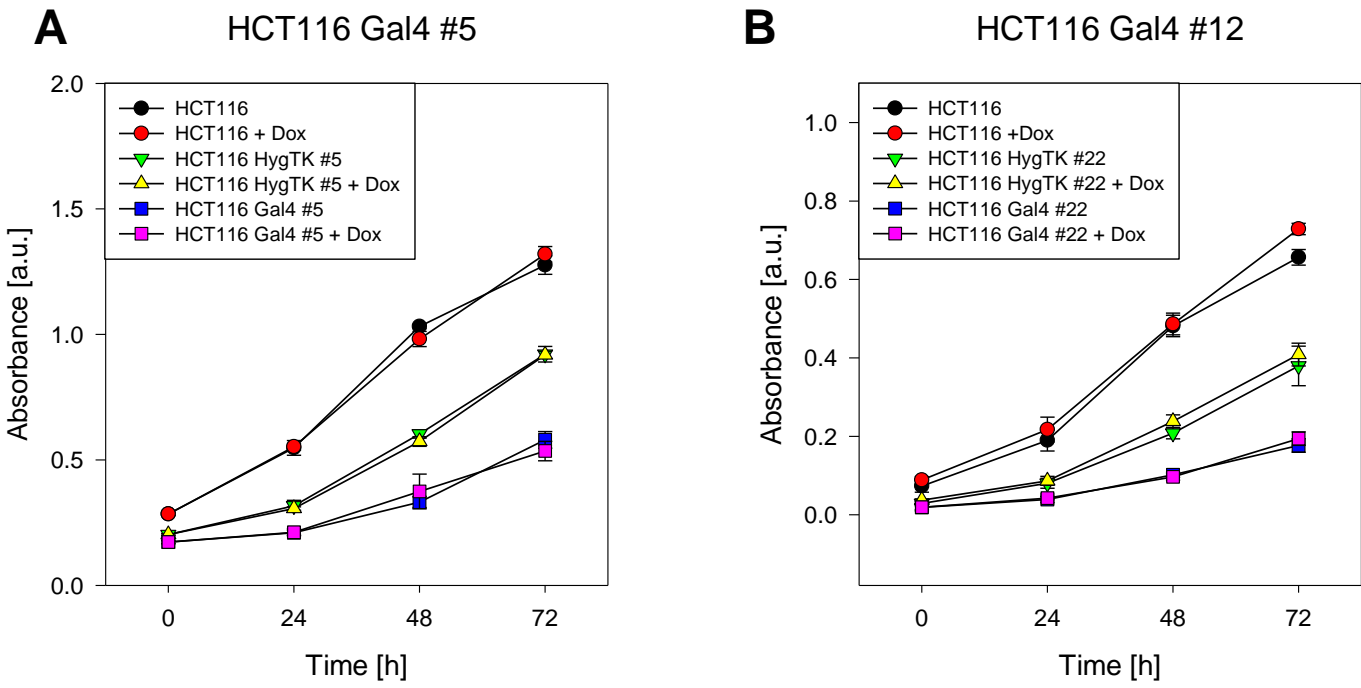

Figure S1. Effect of Doxycycline and Gal4 re-expression on cell proliferation. Model cell lines HCT116 Gal4 #5 (A) and #22 (B) as well as HCT116 and master cell lines HCT116 HygTK #5 and #22 were assayed in the presence or absence of doxycycline (0.5 $\mu\text{g}/\text{ml}$ (A) and 0.75 $\mu\text{g}/\text{ml}$ (B)) and data were obtained at the indicated time points. Measured absorbance represent relative cell numbers in the MTS assay. Results are the means of four independent series (+/-S.D.).
