

Figure S1. Cytokine concentrations in supernatant of LPS-stimulated PBMCs obtained from healthy study participants. Protein concentrations of IL-1 β (a), IL-6 (b) and TNF- α (c) in cell culture supernatant of PBMCs stimulated with 0 or 100 ng/ml LPS for 6 h isolated from healthy study participants receiving either a placebo or the study drink containing XN. IL, interleukin; LPS, lipopolysaccharide; PBMC, peripheral blood mononuclear cell; XN, xanthohumol. Data are expressed as means \pm SEM. * = $p < 0.005$.
