

**Supplementary Figure S1.** The effect of zebularine on the expression of IL-10 and IL-11 mRNAs in obstructed kidneys

The mRNA expression of *IL-10* (A) and *IL-11* (B) was measured by qRT-PCR as described in Materials and Methods using GAPDH mRNA as the internal reference gene. QRT-PCR was performed independently three times, each reaction of which was performed in duplicate. The results were presented as mean  $\pm$  standard error of the mean (SEM).
