

**Figure S1.** Effects of different culture media on callus induction from 84K leaves. The leaves were placed on CIM1 (A), CIM2 (B), CIM3 (C), and CIM4 (D). After 6 weeks, the induction of callus regeneration was observed. Three replicates were performed, and each replicate contained 27 explants.

**Figure S2.** Effects of different culture media on shoot induction from 84K calli. The calli were placed on SIM1 (A), SIM2 (B), and SIM3 (C). After 5 weeks, the induction of shoot growth was observed. Three replicates were performed, and each replicate contained 27 explants.
