

Supplementary Table S1. Microsatellite instability detailed descriptive pattern based on Promega 1.2 results (n=114).

N (% of total)	BAT-25	BAT-26	NR-21	NR-24	MONO-27
Stable	94 (82.5)	91 (79.8)	103 (90.4)	102 (89.5)	88 (77.2)
Unstable	20 (17.5)	23 (20.2)	11 (9.6)	12 (10.5)	26 (22.8)

Twelve cases (9.5% of 126) had no available data and were therefore not considered for the descriptive calculations.
