

Fig. S2. Comparison of two AlphaFold structural models of NcENA1 protein. **A:** Superposition of both models. Green: AlphaFold Protein Structure Database, orange: obtained with AlphaFold2 software in this work. **B:** Plots of per-residue pLDDT metrics for both models. Horizontal dashed lines indicate thresholds for the confidence levels prescribed by AlphaFold as follows. Very high: > 90; high: between 90 and 70; low: between 70 and 50; very low: < 50.
