

**Figure S1. Synergy interaction map in biofilm after treatment with ToAP2 and conventional antifungals.** (A and B) Synergy score of early-phase (4h) and mature (24h) *C. albicans* biofilms after 24h treatment with ToAP2 and/or amphotericin B, respectively. (C and D) Synergy score of early-phase (4h) and mature (24h) *C. albicans* biofilms after 24h treatment with ToAP2 and/or fluconazole, respectively. The axes represent the concentrations for ToAP2 (rows) and each antifungal (columns). The heatmap scales vary from red, indicating a synergistic effect, to green, indicating an antagonistic effect. Data are presented as mean ± standard error of the mean of three independent assays.
