

Supplementary Figure Legend

Supplementary Figure S1. Dynamic growth of ASFV-GZ in different cell lines. MA-104, 3D4/21, PK-15 or WSL cells were infected with ASFV-GZ (1 TCID₅₀/cell) and viral genome copies were calculated at the indicated times post-infection.

A

		Percent Identity			
		1	2		
Divergence	1	■	80.7	1	Porcine_gene.fasta
	2	22.7	■	2	Monkey_gene.fasta
		1	2		

B

		Percent Identity			
		1	2		
Divergence	1	■	72.7	1	Porcine_protein.fasta
	2	33.9	■	2	Monkey_protein.fasta
		1	2		

Supplementary Figure S2. Nucleotide (A) and protein (B) sequence homology of PRLR between pigs and African green monkeys was analyzed by the Clustal W method in MegAlign software.
