

**Table S1.** Antimicrobial susceptibility of the VRE-pathogens. Data of two patients were not available because these tests were not performed in our hospital.

	<b>VRE-Pathogen</b>	<b>Phenotype</b>	<b>Linezolid</b>	<b>Daptomycin</b>
1)	<i>Enterococcus faecium</i>	Van-B	S	
2)	<i>Enterococcus faecium</i>	Van-A	S	
3)	<i>Enterococcus faecium</i>	Van-B	S	
4)	<i>Enterococcus faecium</i>	Van-B	S	
5)	<i>Enterococcus faecium</i>	Van-B	R	MIC=1 µg/ml
6)	<i>Enterococcus faecium</i>	Van-B	S	
7)	<i>Enterococcus faecium</i>	Van-A	S	
8)	<i>Enterococcus faecium</i>	Van-B	R	MIC=1 µg/ml

VRE: Vancomycin-resistant Enterococci, S: Sensitive, R: Resistant, MIC: Minimum Inhibitory Concentration
