

Supplementary Table 1. Cellular functional activity in smooth muscle cells evaluated by micrometric assay

LENGTH (μM)	CTR	DIV	cDD
<i>LONGITUDINAL</i>	61.96 \pm 4.03	63.37 \pm 3.93	61.82 \pm 5.12
<i>CIRCULAR</i>	61.02 \pm 4.05	62.70 \pm 4.72	61.28 \pm 4.37

Data are expressed as mean \pm SE of percentage decrease of controls, 4-7 experiments. CTR (control), DIV (diverticulosis), cDD (complicated diverticular disease).
