

Supplementary Figure S1

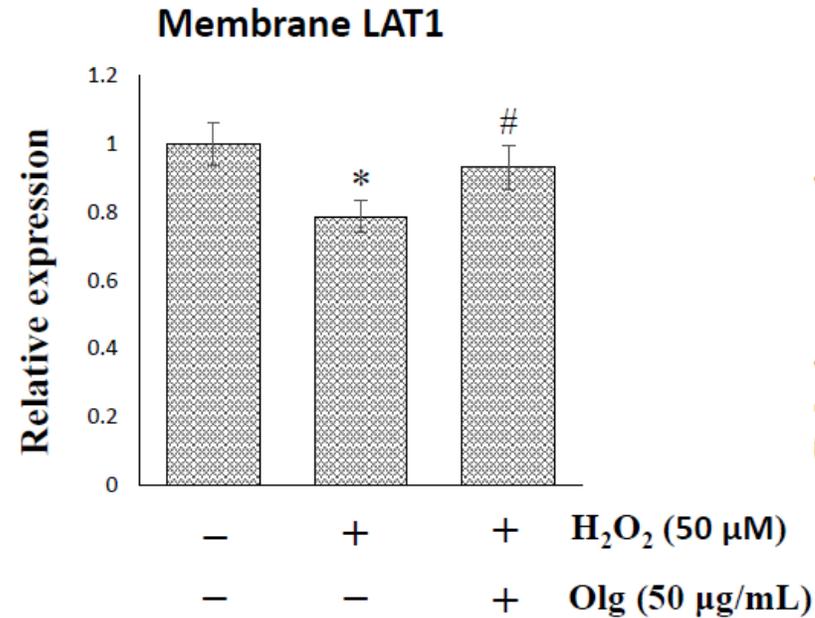

Supplementary Figure S1. (A) Representative images and (B) the quantitative data of LAT1 detected by immunoblots in C2C12 myotubes treated by scrambled or LAT1 siRNA. Results were normalized to the loading control and then compared the normalized data to scrambled siRNA. Data represent means \pm SEM ($N=3$). ** $P<0.01$ compared to the scrambled siRNA group.

Supplementary Figure S2

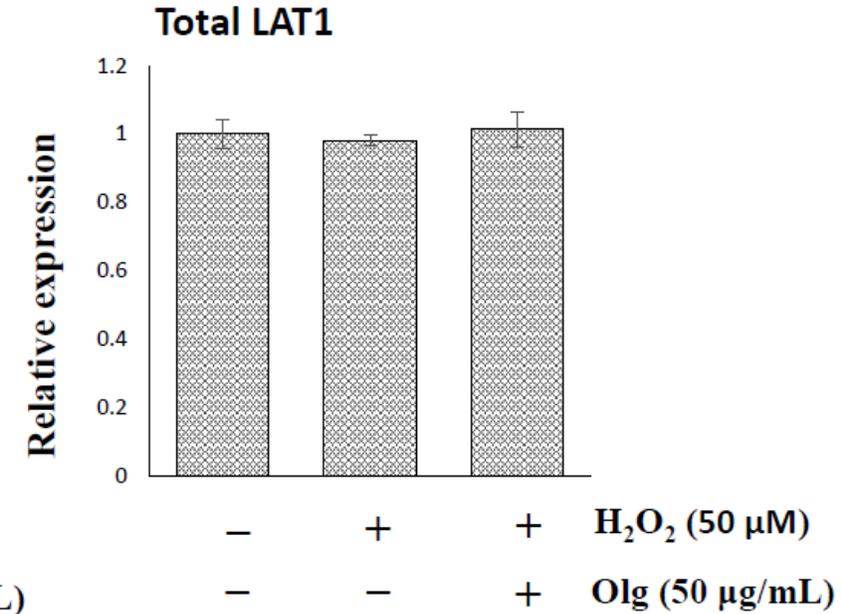

A

B

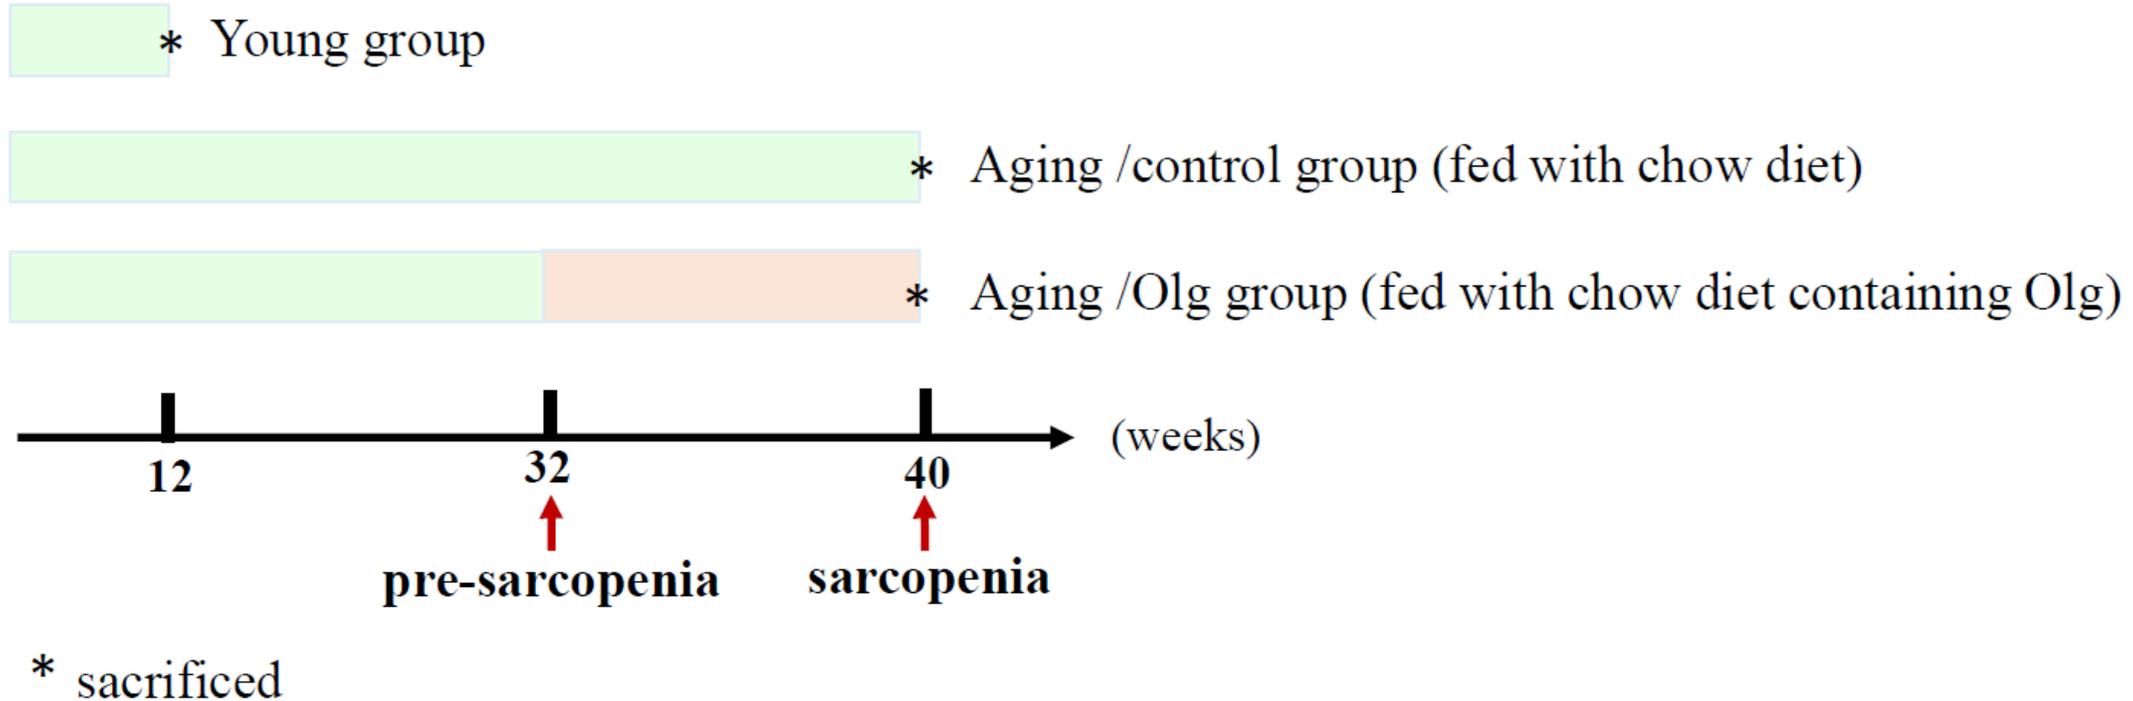

C

Supplementary Figure S2. (A) Representative images of LAT1 detected by immunoblots in C2C12 myotubes treated by H₂O₂. The quantification of LAT1 on (B) sarcolemma and (C) total lysate. Results were normalized to the loading control, and then the mean ratio to the untreated group was shown in the histograms. Data represent means \pm SEM ($N=4$). * $P<0.05$ compared to control group. # $P<0.05$ compared to H₂O₂ treated group.

Supplementary Figure S3

Senescence-Accelerated Mouse Prone 8 (SAMP8)

Supplementary Figure S3. Schematic diagram of experiments using a mouse model of SAMP8 mice.
