

Zoom-in of panels b-f

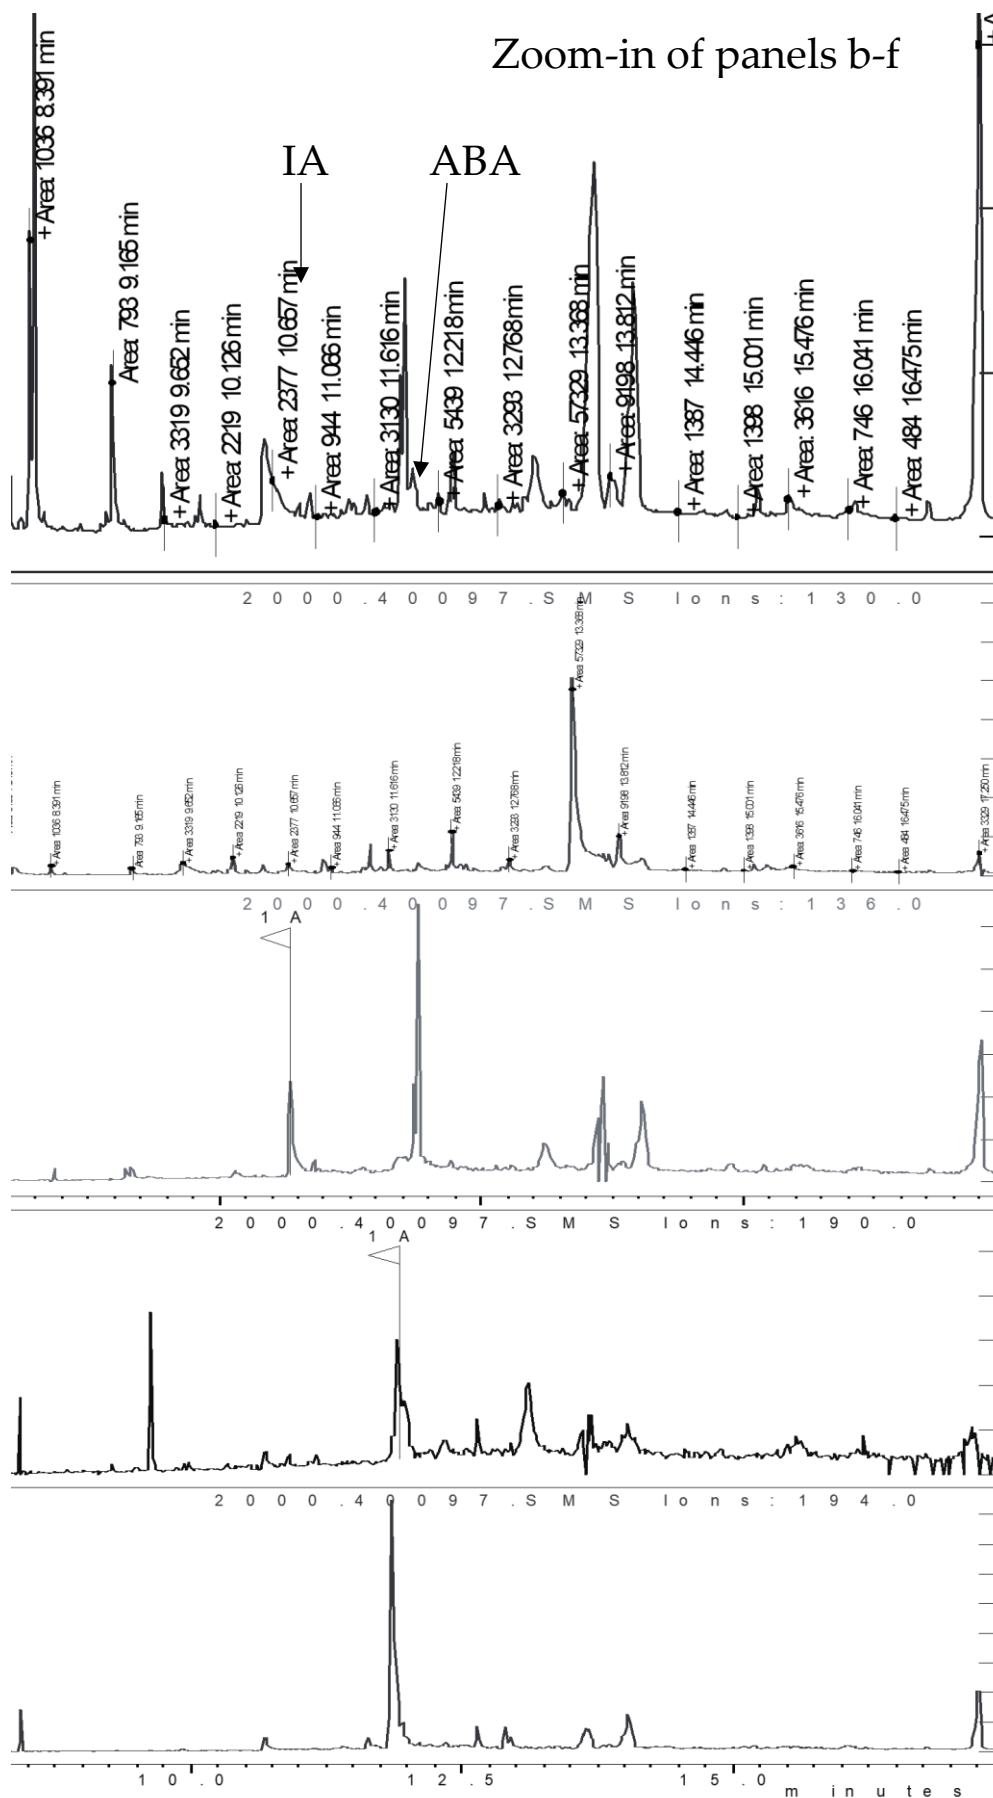

Figure S5. GC-MS chromatograms of standards and a selected sample. Upper panels: (a) standard chromatograms of IAA (blue line) and ABA (black line), (b) total ion chromatogram (TIC) of sample, (c) ion trace m/z 130 depicting endogenous IAA, (d) ion trace m/z 136 representing the labeled standard, (e) ion trace m/z 190 depicting endogenous ABA, (f) ion trace m/z 194 representing the labeled standard. Lower panels represent zoomed-in areas of the chromatograms in b-f. IAA and ABA peaks are indicated by arrows.
