

Table S1. List of observations. Given are species names, family, source (iNaturalist ID or citation) geographical coordinates and reproductive status (R = reproductive, NR = no reproduction, unclear = quality of picture does not allow the determine reproductive status). In doubtful cases only family, genus or two possible species are given.

Taxon	Family	Source	Latitude	Longitude	reproduction
<i>Aechmea organensis</i>	Bromeliaceae	[1]	-25.11	-50.17	unclear
