

Figure S1. The viability of RAW264.7 cell cultured with different dosages of CPPS-I ,CPPS- II , CPPS-III and LPS evaluated by CCK-8 assay after incubation for 24h (n=4).

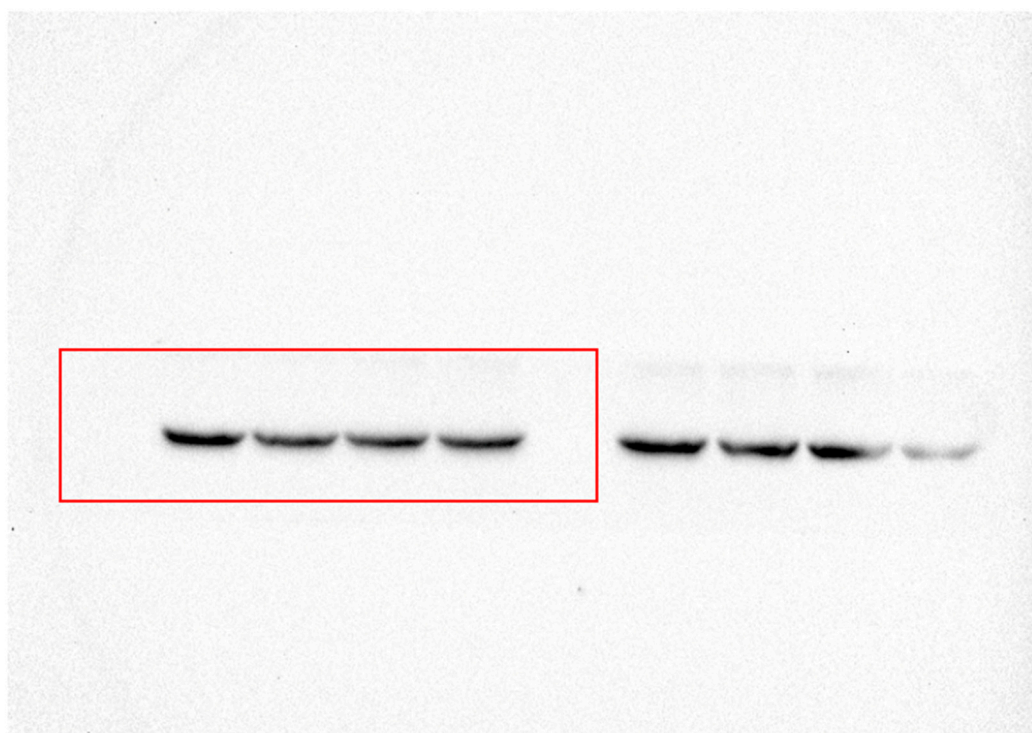

Figure S2. Beta-actin protein.

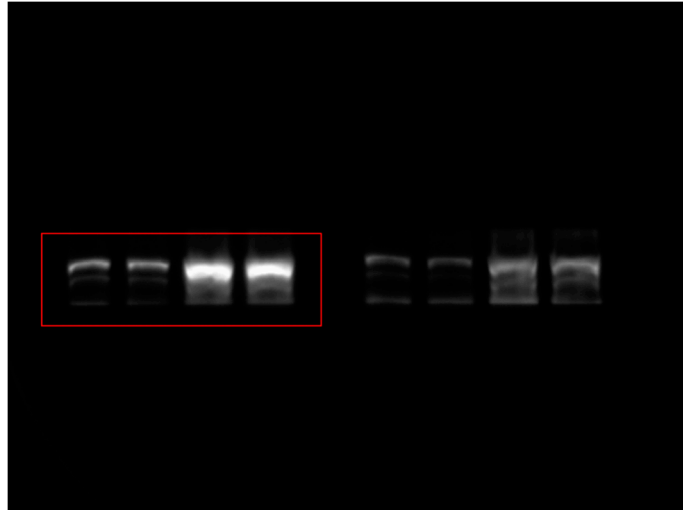

Figure S3. P-Stat1 protein expression levels of tumor tissues in different groups.

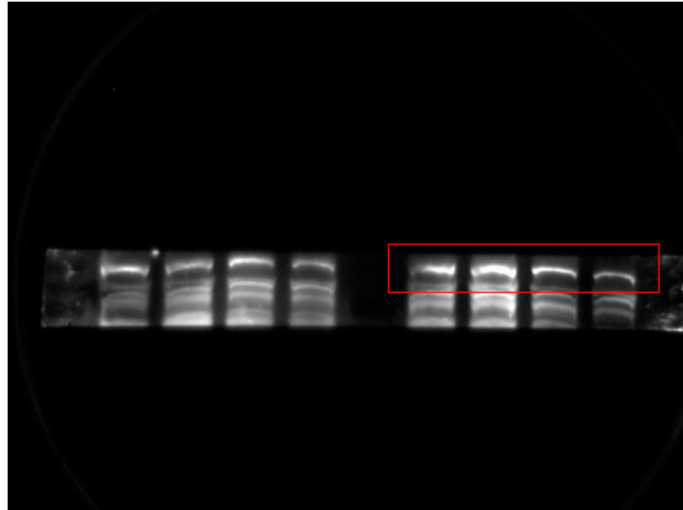

Figure S4. P-Stat3 protein expression levels of tumor tissues in different groups.

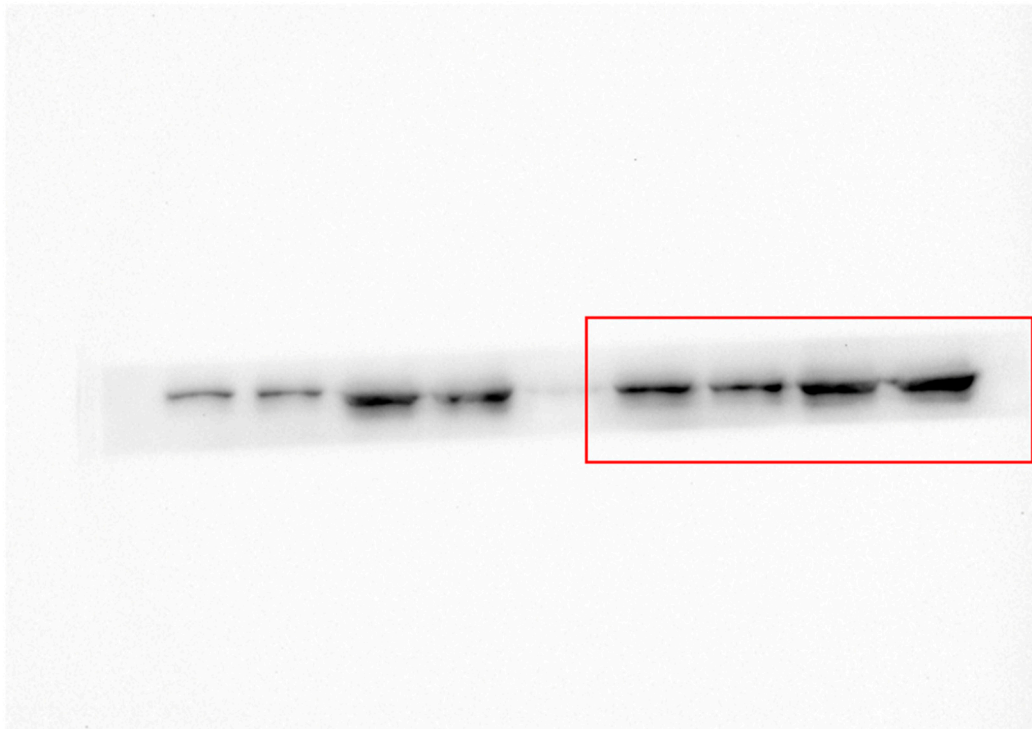

Figure S5. Stat1 protein expression levels of tumor tissues in different groups.

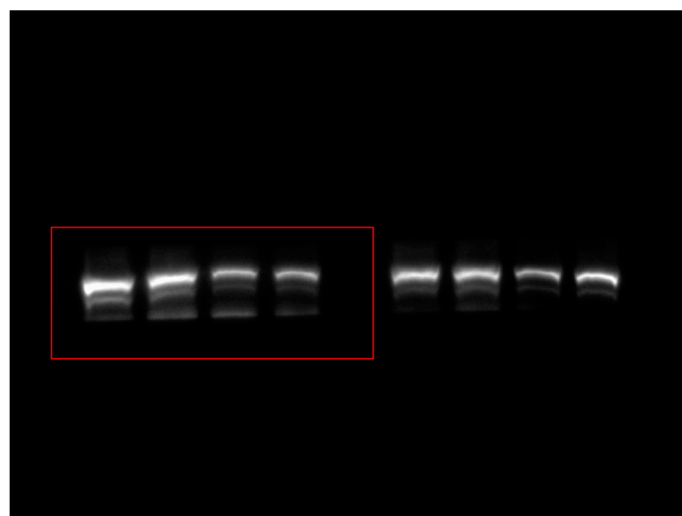

Figure S6. Stat3 protein expression levels of tumor tissues in different groups.
