Supplementary Figures.

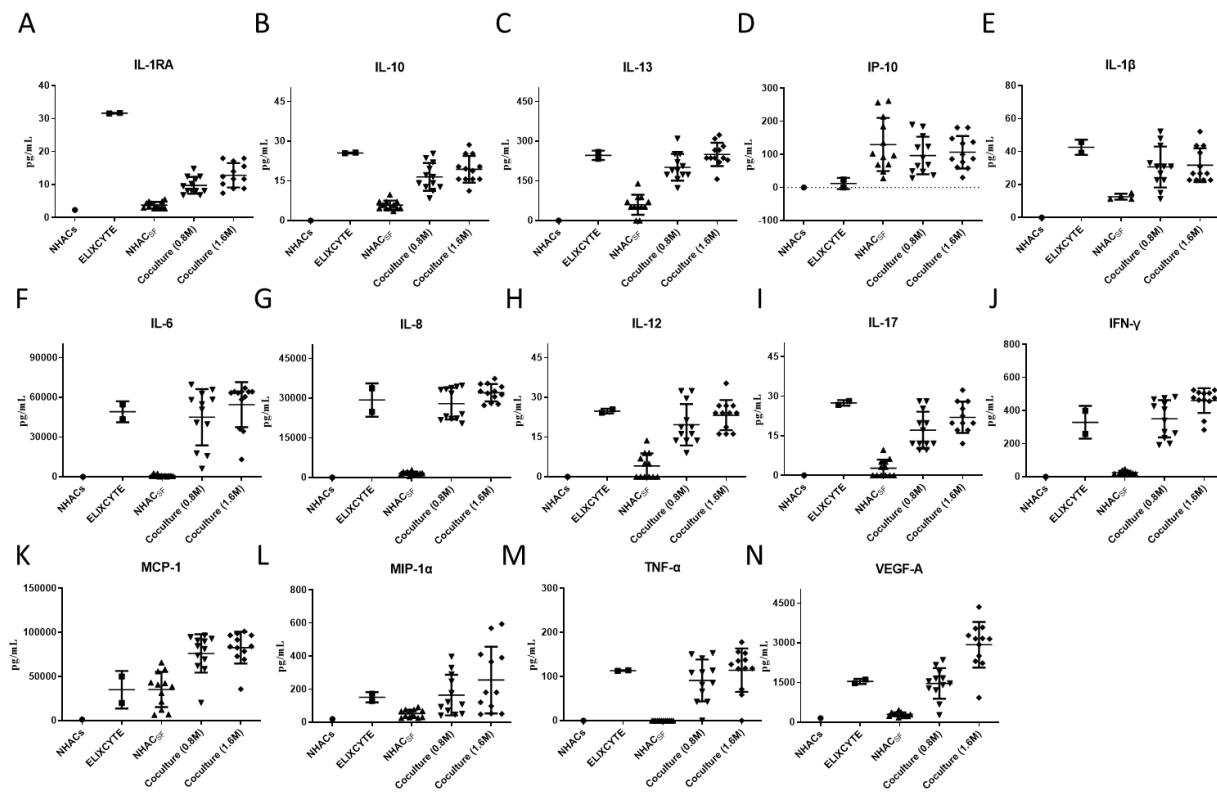

Figure S1. Release of cytokines/chemokines/growth factors among different condition media.

To observe the change of cytokines/chemokines/growth factors, we designed 6 groups, including NHACs, ELIXCYTE®, NHACSF, Coculture (0.8M) and Coculture (1.6M). (A–N) The secretion of IL-1RA (A), IL-10 (B), IL-13 (C), IP-10 (D), IL-1 β (E), IL-6 (F), IL-8 (G), IL-12p70 (H), IL-17A (I), IFN γ (J), MCP-1 (K), MIP-1 α (L), TNF- α (M), and VEGF-A (N) in supernatant of each group was detected. Data are presented as mean \pm SD.
