

Gender/age (mths)	Tumor localization	Clinical stage	Histopathology	Duration of clinical symptoms OMS	Department first hospitalization	First signs	Therapy	Recent oncological status	Recent OMS status	Follow up (mths)
F/24	Suprarenal gland left	I	NBL differentiating type n-myc (-)	3 months	Neurology	opsoclony, myoclony, impaired balance, regression psycho-motoric development	1. resecion 2. GS (2 times) 3. IVIG 4. XVI courses CY+dexa	CR	PR (hyperactivity, intellectual disability)	170
F/36	Suprarenal gland right	I	NBL differentiating type n-myc (-)	1 week	Neurology	impaired balance, nystagmus	1. GS 2. resection 3. IVIG 4. XII courses CY+dexa	CR	CR	155
M/18	Suprarenal gland left	I	NBL differentiating type n-myc (-)	1 month	Neurology	myoclony, weakness of the lower limbs, problems with walking	1. resecion 2. GS 3. IVIG 4. XII courses CY+dexa	CR	PR (periodically myoclony after viral infections)	138
F/36	Paravertebral area L part	I	GNBL intermixed	3 months	Neurology	weakness of the lower limbs, problems with walking, dysarthry	1. GS 2. resection 3. XII courses CY+dexa	CR	PR (hyperactivity)	98
M/14	Suprarenal gland right	I	NBL differentiating type n-myc (-)	2 months	Neurology	regression psycho-motoric development, impaired balance, behavioral difficulties	1. resecion 2. GS 3. IVIG 4. XII courses CY+dexa 5. additionally 3 dexa pulses	CR	CR	87
F/36	Paravertebral area L part	III	NBL differentiating type n-myc (-)	1 month	Neurology	tremors of the upper limbs, impaired balance, behavioral difficulties	1. IVIG 2. partial resection 3. chemotherapy NBL (VP, CBDCA, CY, ADR, VCR)	CRu	CR	60
F/30	Paravertebral area Th part	I	GNBL intermixed	8 months	Neurology	nystagmus, problems with walking	1. resecion 2. GS 3. IVIG 4. VPA 4. XII courses CY+dexa 5. additionally 4 dexa pulses	CR	CR (but after therapy 2 times reactivation, after burns and viral infection)	16
