

Supplementary Table S1. Viability of THP-1 human macrophages and HaCaT human keratinocytes cells treated with different concentrations of fucoxanthin (FX). Values are mean \pm ES (%) of three independent experiments ($n = 3$).

% Viability THP-1 macrophages (24 h)					
(μ M)	10	30	50	100	IC ₅₀
FX	97.5 \pm 2.0	96.5 \pm 1.2	103.7 \pm 1.1	90.7 \pm 0.5	> 100

% Viability HaCaT keratinocytes (24 h)					
(μ M)	10	30	50	100	IC ₅₀
FX	111.2 \pm 2.1	105.2 \pm 4.0	103.9 \pm 3.2	101.5 \pm 2.2	> 100
