

Supplementary Figure S1

Effects of fucoidan extracts on THP-1 cell viability. Cells were treated with the specified concentrations of fucoidan extract for 48 h and assessed by MTT reduction assays. Results expressed OD of treated cells vs vehicle control. Data represented as means \pm SEM. Statistical analysis were carried out using one-way ANOVA followed by Tukey's multiple comparison test. A p-value of <0.05 is considered significant if applicable.
