Due to an error during production, the legend of Figure 1 in the published paper [1] was incorrect. The correct figure is as follows:

Figure 1. Predicted probability of intermediate c-reactive protein by education and race/ethnicity. Note: Differences across groups statistically significant at the $p < 0.001$ level. Model controls for age, diabetes, heavy drinker, HBP, HWC, income, sex, smoker, and statin use.

We apologize for any inconvenience caused to readers or authors by these changes. The article will be updated and the original will remain available on the article webpage.
