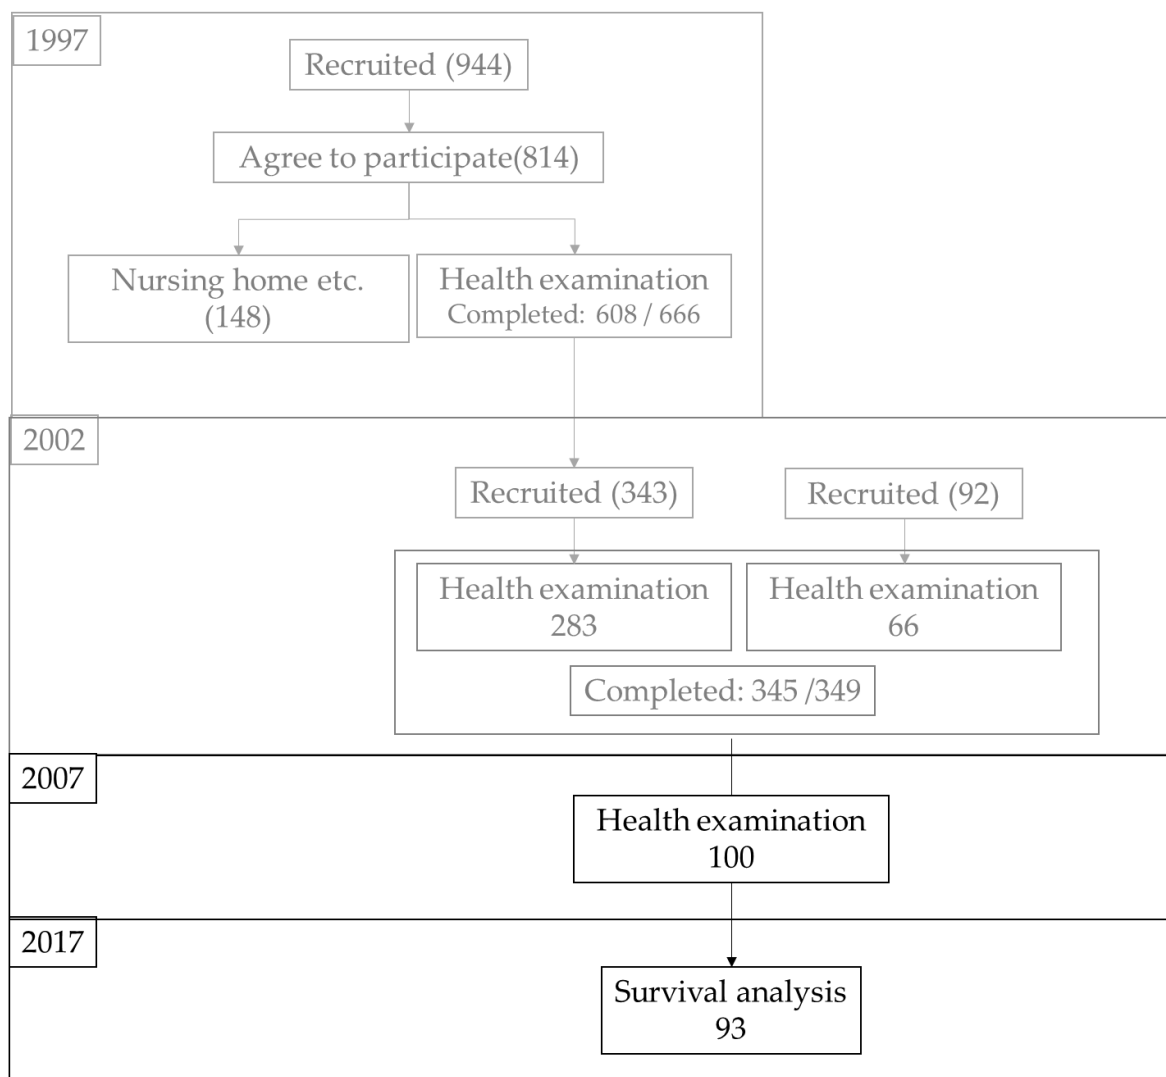

Figure S1. Diagram of the study design
In this study, data of box in black were used for analysis.

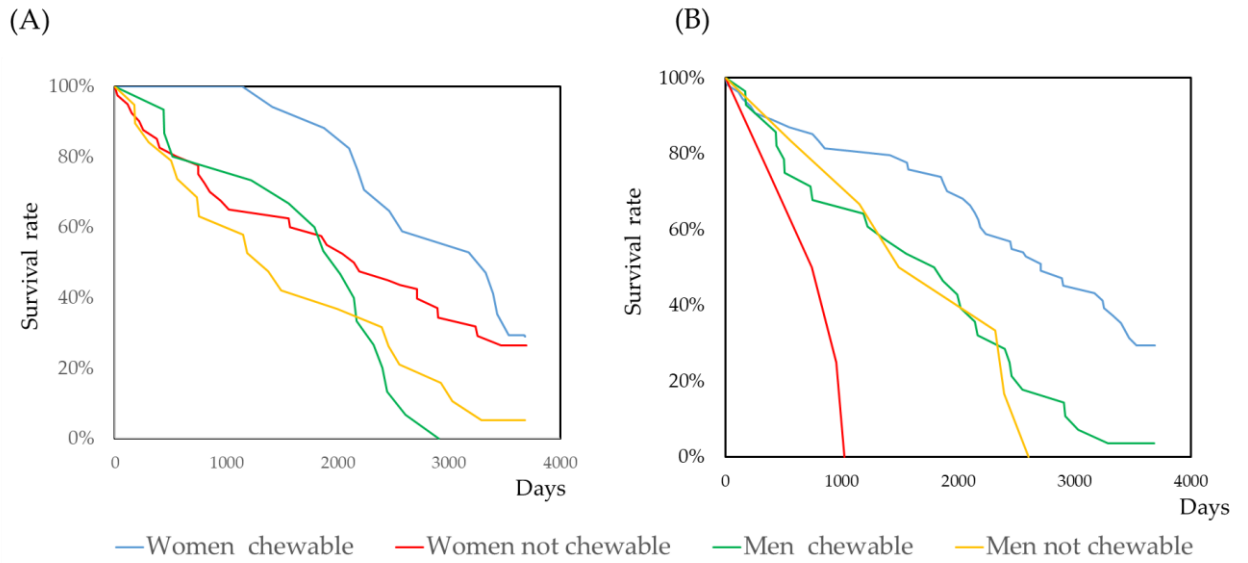

Figure S2. Survival curves by chewable of "Dried scallops" and "Konnyaku-jelly"

(A): Survival curve for Dried scallops (B) Survival curve for Konnyaku-jelly. Subjects participated in this study were classified by chewable or not for "Dried scallops" and "Konnyaku-jelly".

Statistical significance for "Dried scallops" evaluated by Log Rank test, Breslow tests, Tarone-Ware tests were $P=0.229$, $P=0.053$, and $P=0.106$ for woman and $P=0.574$, $P=0.642$, and $P=0.973$ for men, respectively. Statistical significance for "Konnyaku-jelly" by Log Rank test, Breslow tests, Tarone-Ware tests were $P<0.001$, $P=0.001$, and $P<0.001$ for woman and $P=0.751$, $P=0.828$, and $P=0.992$ for men, respectively.

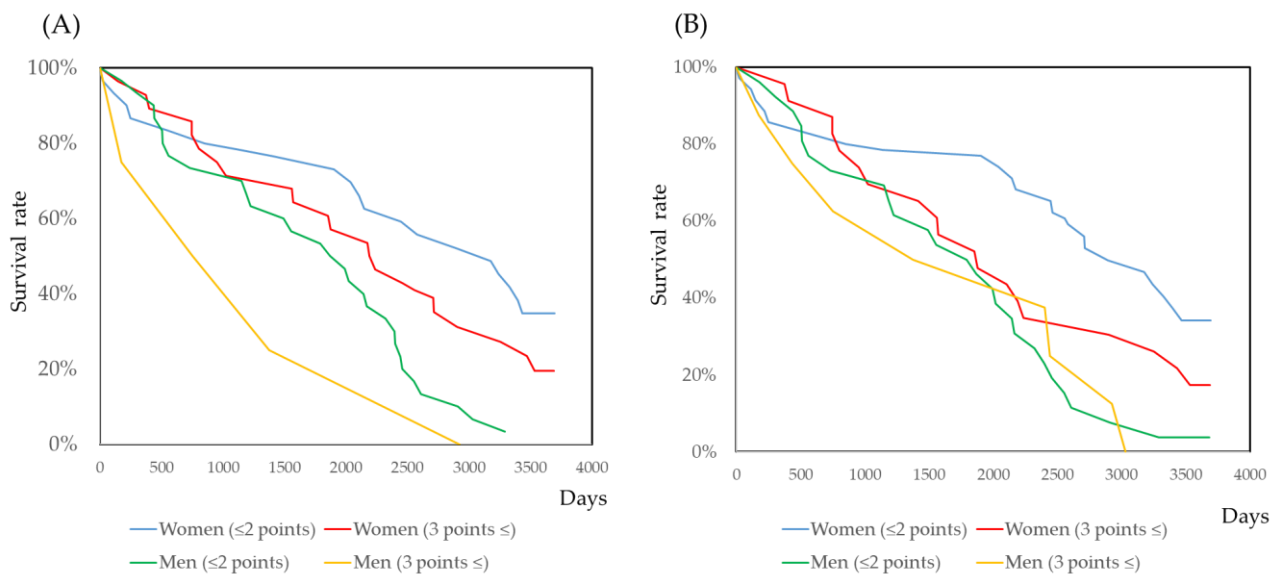

Figure S3. Survival curves by subscales of ADLs

Subjects participated in this study were classified by the "Intellectual activity" and "Social role" of the subscales of TIMG index. Statistical significance for "Intellectual activity" evaluated by Log Rank test, Breslow tests, Tarone-Ware tests were $P=0.208$, $P=0.293$, and $P=0.241$ for woman and $P=0.823$, $P=0.414$, and $P=0.507$ for men, respectively. Statistical significance for "Social role evaluated" by Log Rank test, Breslow tests, Tarone-Ware tests were $P=0.100$, $P=0.120$, and $P=0.102$ for woman and $P=0.806$, $P=0.903$, and $P=0.800$ for men, respectively.

Normality was calculated by Kolmogorov–Smirnov test. P>0.05 indicate the value was normally distributed. For physical fitness, tests were dangerous or burden for the some subjects. Number of subjects escaped the tests were as follows: had grip(1), stepping(3), and 5m walk(8). AST: Aspartate transaminase, ALT: Alanine

aminotransferase, γ -GTP: γ -Glutamic Pyruvic Transaminase, HDL: High density lipoprotein, LDL: Low density lipoprotein. HbA1c: Hemoglobin A1c.

"Discrimination" indicates the steepness of the item response curve, "Difficulty" indicate the location of item response curve and "Guessing" indicates the baseline of vertical values of item response curve.
