

Supplementary File S6: Presentation of findings for assessing and accounting for small-study effects

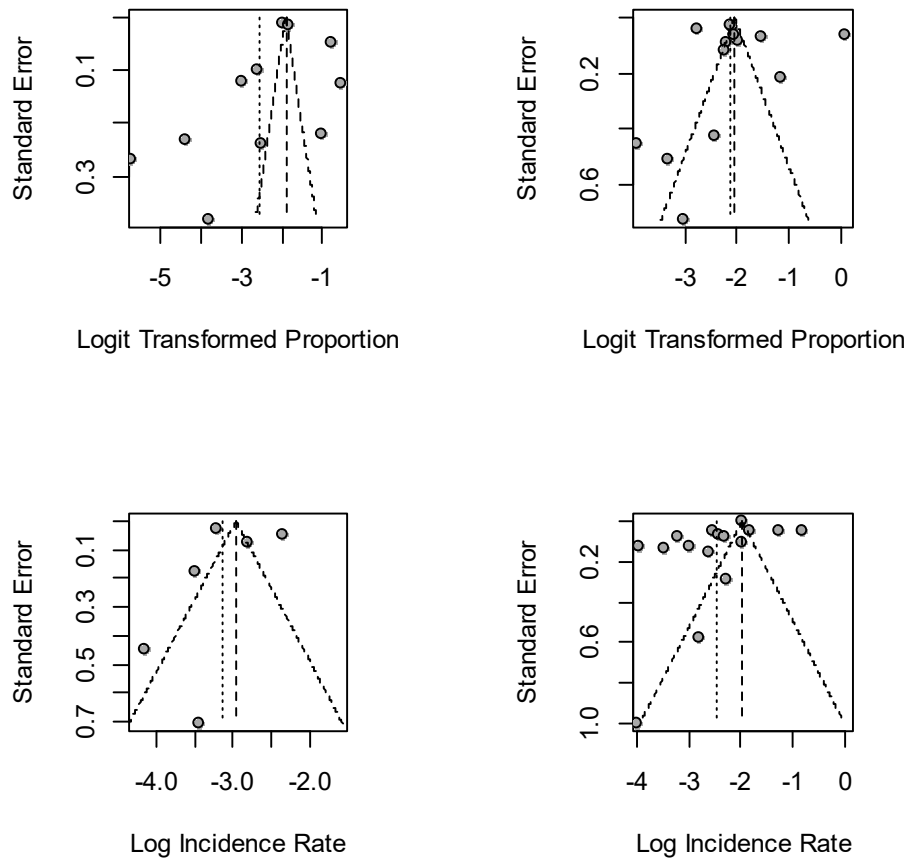

Figure S1. Funnel plots for assessing and accounting for small-study effects in the meta-analysis of: 1). prevalence of COVID-19 among studies using the AB method of test (*left-top panel*); 2). prevalence of COVID-19 among studies using the PCR method of test (*right-top panel*); 3). Incidence rate of COVID-19 among studies using the AB method of test (*left-bottom panel*); 2). Incidence rate of COVID-19 among studies using the PCR method of test; (*right-bottom panel*).

Figure S2. Funnel plots for assessing and accounting for small-study effects in the meta-analysis of risk of COVID-19 between patient and non-patient facing HCWs.
