Data Extraction Tool

Scoping Review Details	
Scoping Review title:	Tools for Measuring the Impact of Indigenous Peoples within the United States' Ethnic Identities on Psychosocial Stressors
Review objective/s:	<ul style="list-style-type: none"> • Aim1: To determine where researchers are conducting their research in the United States: in which regions, and with which specific Indigenous populations • Aim 2: To determine the number of tools being utilized when conducting research with Indigenous populations and measuring ethnic identity and describe these tools <ul style="list-style-type: none"> ○ Aim 2.1: Determine the variables included in each data collection tool • Aim 3: To better understand what is known about the relationship between Indigenous ethnic identity and mental wellbeing
Review question/s:	What tools currently exist to measure Indigenous ethnic identity for United States Indigenous populations in studies on psychosocial stressors?
