

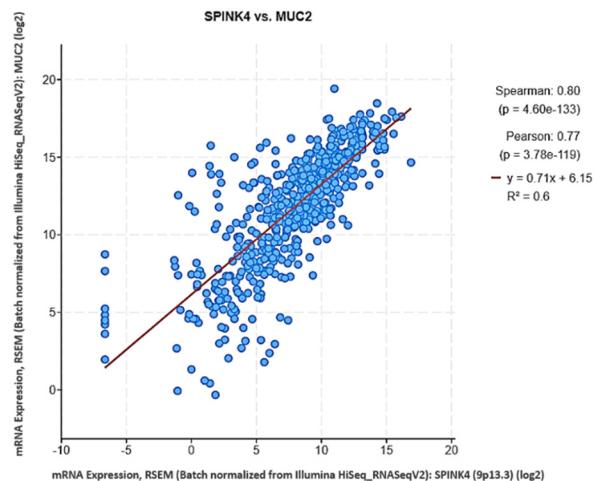

**Figure S1.** The biological processes enriched in *SPINK4* upregulation and downregulation. The genes co-expressed with *SPINK4* in colorectal adenocarcinoma in the TCGA database ( $n = 594$ ) were surveyed using the cBioPortal online platform (<http://cbioportal.org>). The gene list (top 200 transcripts) from either (A) positive correlation or (B) negative correlation was further analyzed using PANTHER (<http://pantherdb.org>) according to biological process and ranked by fold enrichment for functional annotation.

**Figure S2.** Correlations between *SPINK4* and *MUC2* gene expression. The data were exported from the TCGA database ( $n = 594$ ) using the cBioPortal online platform.

**Table S1.** The top 200 genes positively correlated with *SPINK4*.
