Supplementary material

Table S1. Variables used in this study.

| Variable | Description (groups or units) |
|-------------------------------|---|
| Gender | The gender of the patients (female or male) |
| Age | The age of patients at diagnosis (years) |
| Histology | Histological type of colon cancer (adenocarcinoma or mucinous adenocarcinoma) |
| Localization | Localization of lesions in the colon (left or right) |
| Liver metastases | Presence or absence of liver metastases |
| Colectomy | Presence or absence of colectomy |
| Metastasectomy | Presence or absence of metastectomy |
| Radiotherapy | Presence or absence of radiotherapy to colon cancer |
| Monoclonal antibodies therapy | Use of monoclonal antibodies therapy to colon cancer (e.g CUALES?) |
| Second line of treatment | Type of second line of treatment: FOLFOX or FOLFIRI |
| Overall survival | Survival from diagnosis until death for any cause |

Note: All patients received FOLFOX or CapeOx as the first-line treatment.

YO CREO QUE LO QUE PEDÍA EL REVISOR ERA ALGO UN POCO MÁS COMPLETO
