

Figure S1 – Inter-rater variance analyses

Figure S1:

Analyses of inter-rater variance for each recommendation category. **(a)** Inter-rater variance for ratings of surgical therapy recommendations. **(b)** Inter-rater variance for ratings of chemotherapy. **(c)** Inter-rater variance for ratings of endocrine therapy recommendations. **(d)** Inter-rater variance for ratings of radiotherapy recommendations. **(e)** Inter-rater variance for ratings of antibody therapy recommendations. **(f)** Inter-rater variance for ratings of therapy alternatives. Experts rated the suggestions with the following scale: *correct without limitations* = 1, *correct with minor limitations* = 2, *better alternative available* = 3, *partially wrong* = 4 and *completely wrong* = 5. Boxplots include marked median. * $p < 0.05$ (Students T-test).
