The research work leading to this paper [1] received funding from the European Union's Horizon 2020 research and innovation programme. Part of the research was supported under the Fuel Cells and Hydrogen Joint Undertaking grant agreement No. 826234 (project WASTE2WATTS, Unlocking unused bio-WASTE resources with loW cost cleAning and Thermal inTegration with Solid oxide fuel cells) and part under grant agreement No. 768543 (project ICO2CHEM, From industrial CO₂ streams to added value Fischer-Tropsch chemicals).
