

S1: Local allometric equations for prediction of stem diameter at breast height (DBH) from measured tree height (H). Graphs are presented for Norway spruce for 11 stream catchments. Comparable number of samples were selected across all catchments and all tree height categories.

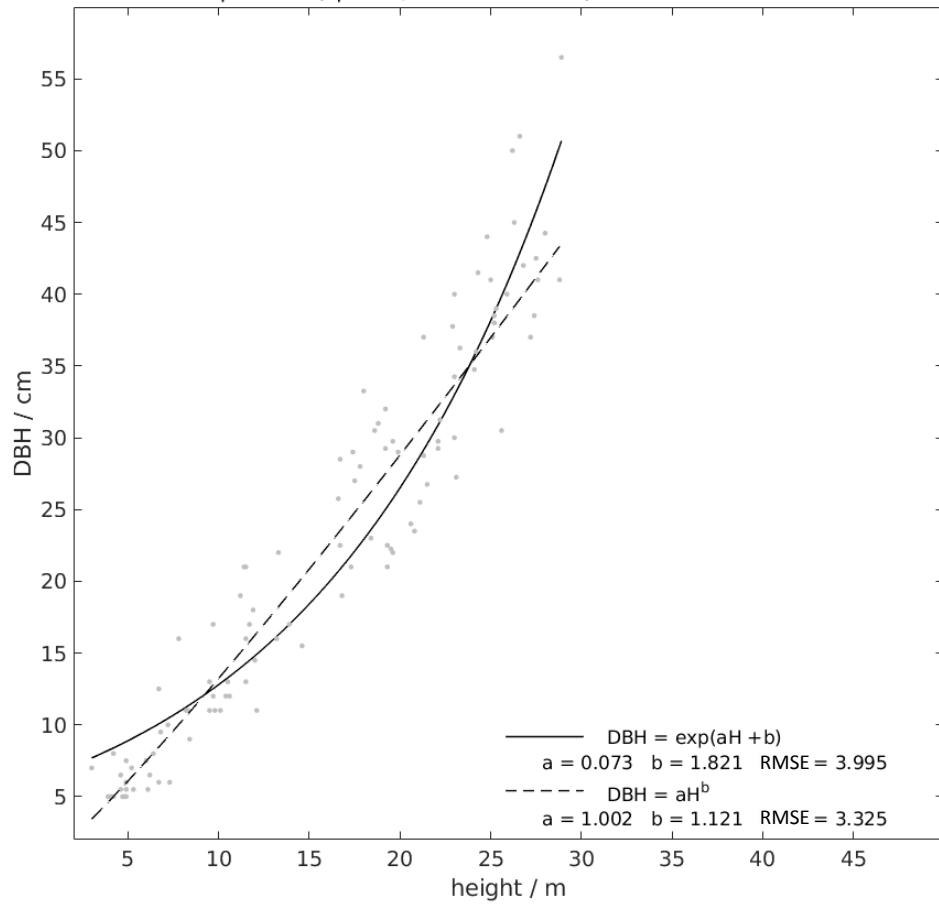

Local DBH equations (spruce, LIZ catchment)

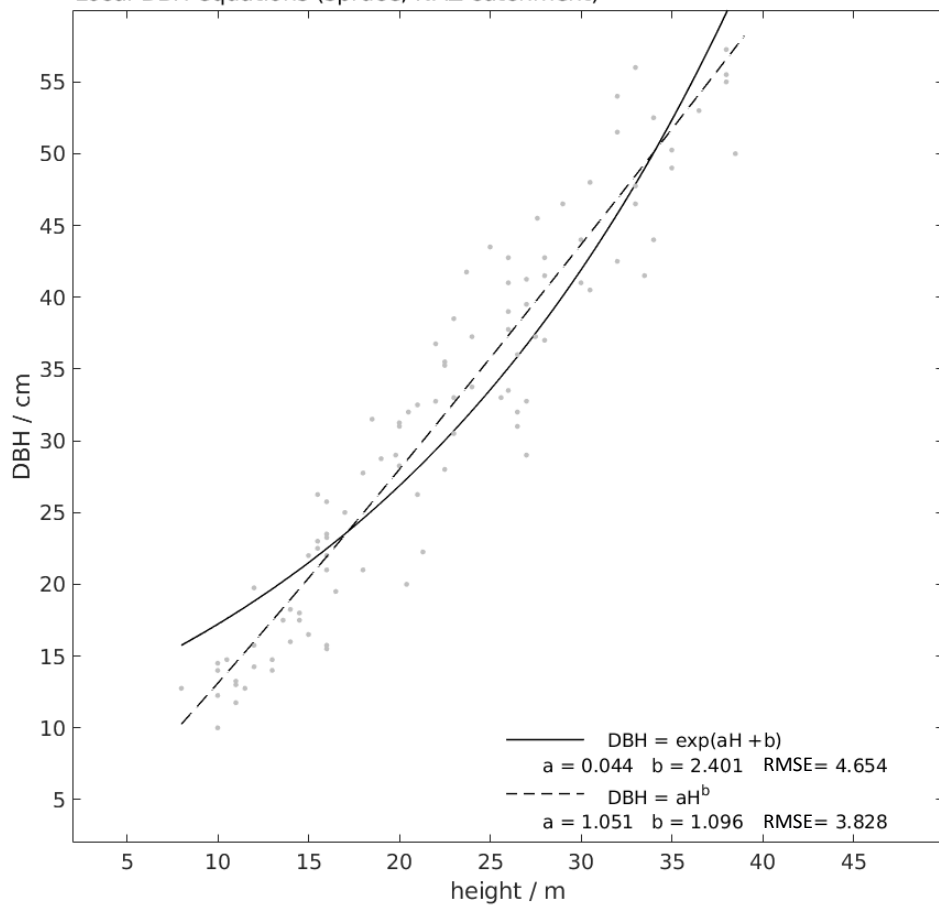

Local DBH equations (spruce, LKV catchment)

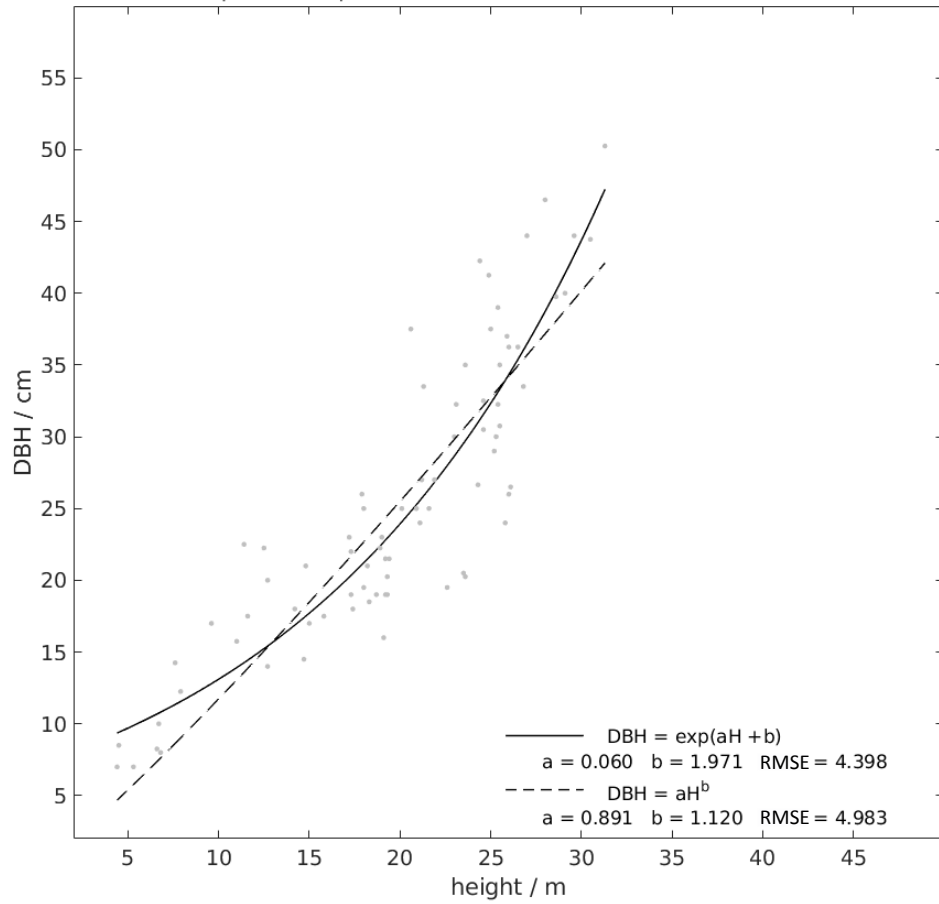

Local DBH equations (spruce, LYS catchment)

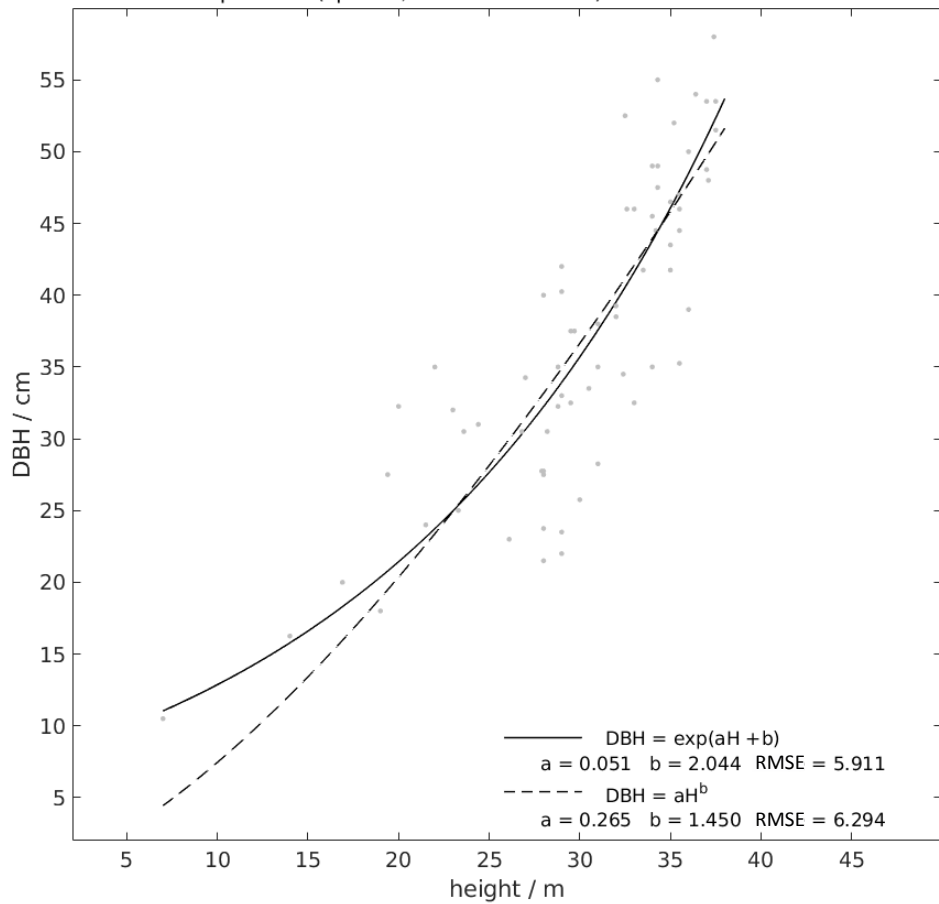

Local DBH equations (spruce, NAZ catchment)

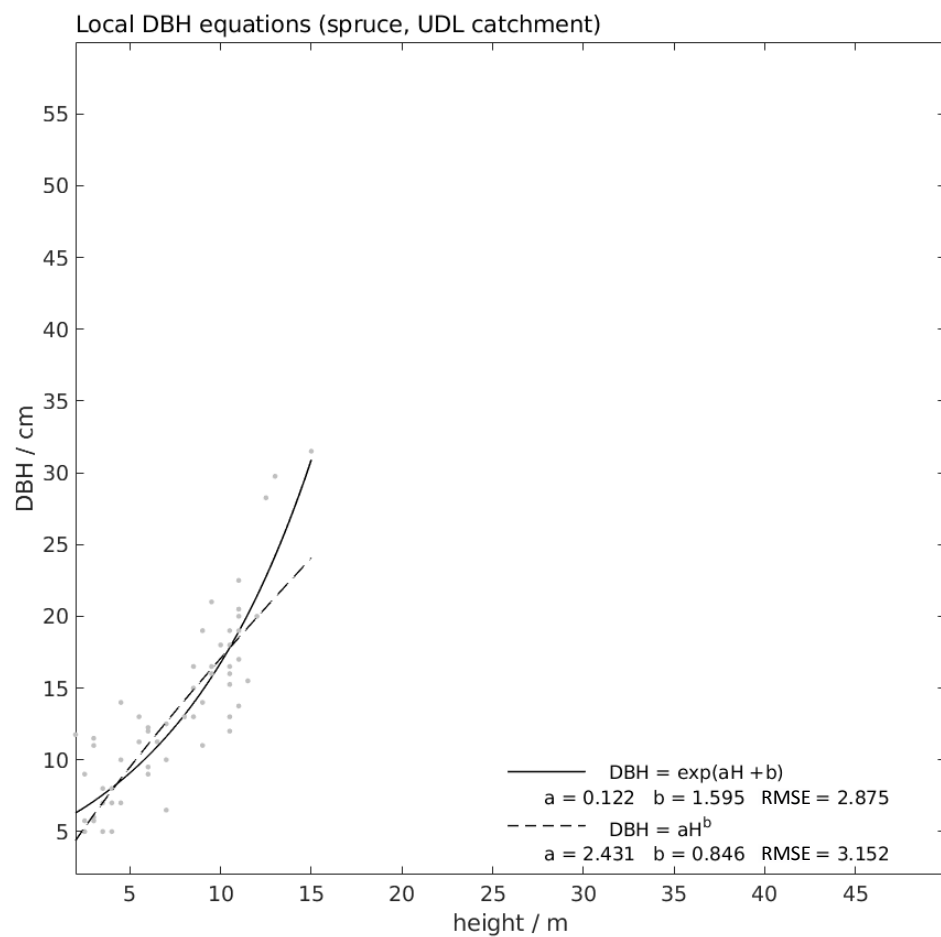

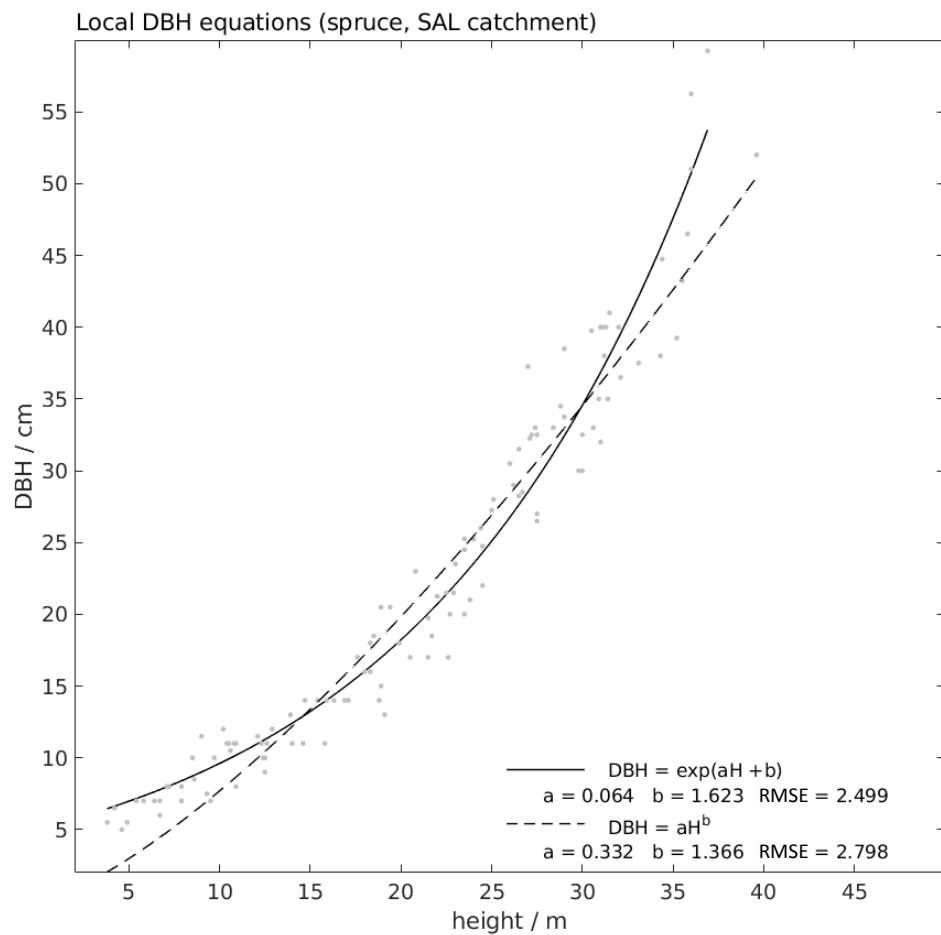

Local DBH equations (spruce, PLB catchment)

Local DBH equations (spruce, POM catchment)

Local DBH equations (spruce, UHL catchment)
