

OPINION ABOUT THE NATURE RESERVE 'LISIA GÓRA' IN RZESZÓW

Lisia Góra is the only nature reserve in the Rzeszów metropolitan area. The reserve's future protection plan is being debated. Considering several possible options of the LG management, we would like to ask the LG visitors about their preferences in that respect. The survey is being carried out by the Faculty of Biology and Agriculture in cooperation with the Faculty of Physical Culture of University of Rzeszów.

A1. Sex

☐ [1] female ☐ [2] male

A2. Age:

A3. Home place (town/village):

B1. How many times do you visit Lisia Góra per year?

.....

B2. How long does it take for you to get to Lisia Góra?

.....

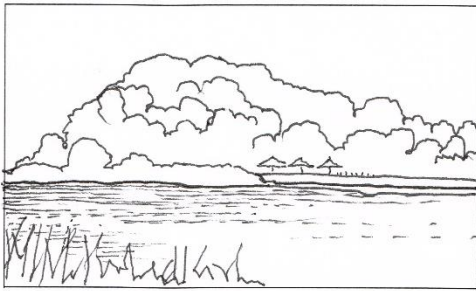

B3. What is the purpose of your visit to Lisia Góra?

.....

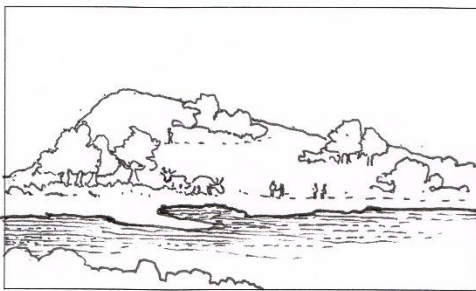

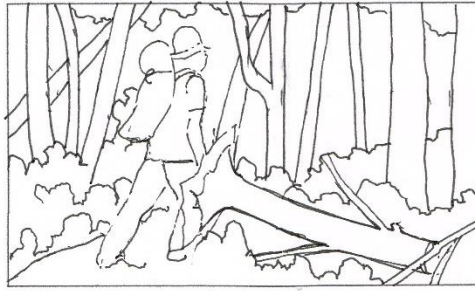

B4. There are potential forms of the management/use of the Lisia Góra area. Please check your preference:

	Way of management	Your evaluation (enter "X")		
		Positive	Negative	Neutral
[1]	Nature reserve with access legal restrictions			
[2]	Open landscape with visible topography and groups of prominent trees			
[3]	Dense forest following the course of nature			
[4]	Area of mass recreation (play ground, rope park, toboggan run, etc.)			
[5]	Natural footpaths			
[6]	Footpath with infrastructure (handrails, stairs)			
[7]	Widening the road through LG making the car traffic more smooth			
[8]	Limiting the car traffic through LG, organizing a detour if possible			
[9]	Other, important for you, way of land use			

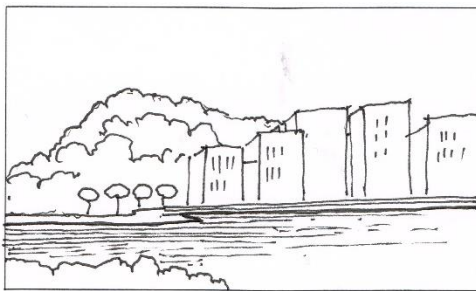

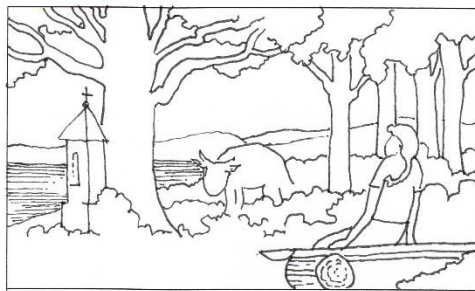

B5. Which aspect of the future LG area would be the most appropriate?

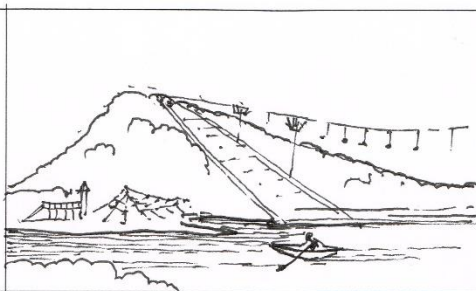

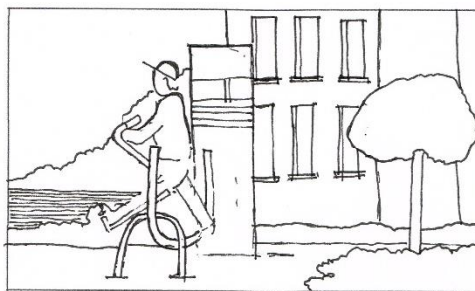

☐ [1] Dense forest

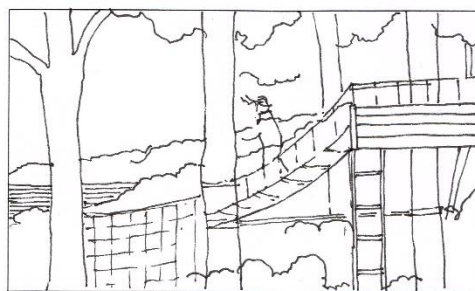

☐ [2] Open area with groups of trees

☐ [3] Backyard of a residential area

☐ [4] Leisure and recreation park

Thank you for your kind cooperation!
