

## Supplementary Materials

**Figure S1.** Germinated seedlings of *Abies marocana* after the growth experiment (twelve weeks) in the greenhouse of the Ecology Area at the University Pablo de Olavide (Seville, Spain).

**Table S1.** Microclimatic conditions measured at the Talassemtane study site. Mean (T), maximum (TM), and minimum (Tm) monthly air temperature (°C). Mean monthly relative air humidity, (RH, %). Mean monthly soil water content, (SWC, vol%). Mean monthly vapor pressure deficit (VPD, kPa).

Month	SWC (%) vol.)	RH (%)	T (°C)	TM (°C)	Tm (°C)	VPD (kPa)
January	39.08	0.78	3.50	14.45	-4.27	0.21
February	40.99	0.73	2.23	13.65	-6.19	0.24
March	40.56	0.83	3.63	18.33	-3.99	0.17
April	37.45	0.69	10.02	22.45	1.29	0.46
May	38.78	0.79	11.48	21.25	2.57	0.32
June	36.66	0.58	16.37	29.65	5.37	0.90
July	28.71	0.40	22.27	31.05	16.29	1.56
August	26.00	0.43	21.72	33.89	9.81	1.53
September	25.16	0.58	16.58	28.69	4.89	0.85
October	35.28	0.71	10.28	24.29	3.29	0.39
November	38.98	0.79	6.10	15.53	-1.07	0.22
December	40.37	0.78	5.34	17.73	-2.79	0.23

**Table S2.** Calculation of the variables used to characterize cone scales morphology.

Variable	Computation	Units	
Area	Area of the object in square pixels or in the square calibrated unit.	cm <sup>2</sup>	
Perimeter	Length of the outer boundary of the selected object.	cm	
Circularity	Calculate the circularity of an object using the formula: $circularity = 4\pi (Area/((perimeter)^2))$ . A circularity value of 1.0 indicates a perfect circle. As the value approaches 0.0, it indicates an increasingly elongated polygon.	Dimensionless	
FERET Diameter	Longest distance between two points along the selection boundary.	cm	
FERET Diameter	Min.	Minimum diameter between two points along the selection boundary.	cm
AR	Aspect ratio, AR=main axe/minor axe	Dimensionless	
Round	ROUND = 1/AR	Dimensionless	
Solidity	Solidity=area/convex area	Dimensionless	
Fractal Dimension	A measure of the complexity of the pattern presented by the object. Fractal Dimension counts the number of cells of increasing size needed to cover a one-pixel binary object boundary.		

**Table S3.** Correlation matrix for cone scales dimensions seed weight and early seedling development (germination, cotyledons emergence and growth). See variable units and abbreviations in Table 1. Significant values, p<0.05, are highlighted in red.
