

A.

UCCLBBS124

B.

UCCLB521

C.

SA-C12

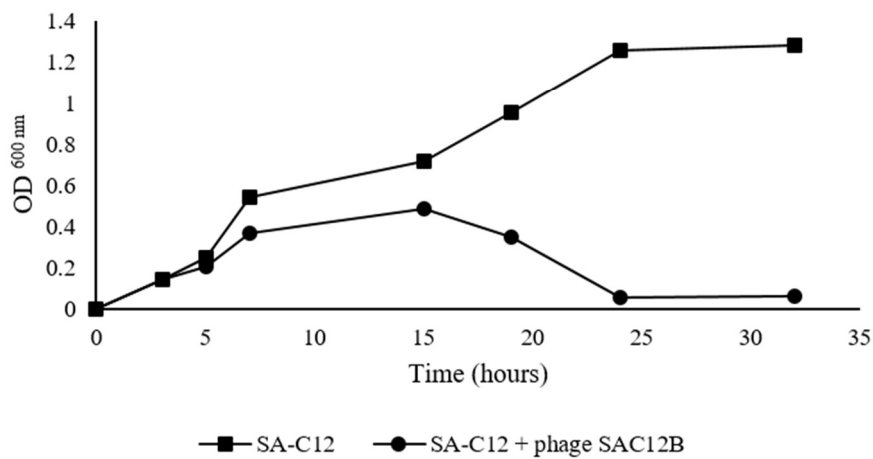

Figure S1: Growth of **(A)** *Lb. brevis* beer-spoiling strain UCCLBBS124, **(B)** *Lb. brevis* strain UCCLB521 and **(C)** *Lb. brevis* strain SA-C12 when challenged with lytic phages (MOI = 1 when the culture reached an OD_{600nm} of 0.2). A culture of the bacterial strain where no phage was added was used as a control.
