Company	Phage Product	Application					References
		Usage on	Application type	Concentration	Time intervals	Field of application	
Intralytix, Inc. (Baltimore, MD, USA)	ListShield™	For direct food applications	Typically applied directly on food surfaces by spraying at a food product surface	Concentration of approximately 1 - 2 mL per 250 sq. cm	/	Post-Harvest - Food Processing Facility	[1]
	EcoShield™	For direct food applications	Industrial sprayer for large direct food applications; handheld sprayer for smaller bench-scale food applications	Diluted working solution - a concentration of 1 - 4 mL per pound of food product	/	Post-Harvest - Food Processing Facility	[2]
	SalmoFresh™	For direct food applications - Red meat and poultry	Industrial sprayer for large direct food applications; handheld sprayer for smaller bench-scale food applications	Diluted working solution - a concentration of 1 - 4 mL per pound of food product	/	Post-Harvest - Food Processing Facility sing Facility	[3]
	ShigaShield™ (ShigaActive™)	Ready-to-eat meats, fish and shellfish, and fresh and processed fruits and vegetables, and dairy products	Direct application onto products	/	/	Post-Harvest - Food Processing Facility	[4]
