Table S1: ANOVA of serum antibody titers in chicks against NDV isolates used for immunization showing the effects of treatment and period

Source of variation	DF	SS	MS	F	<i>p</i> value
Interaction	8	48.39	6.049	449.6****	$p < 0.0001$
Time	4	798.8	199.7	14844****	$p < 0.0001$
Treatment	2	117.5	58.75	4367****	$p < 0.0001$
Residual	135	1.816	0.01345		

**** Highly significant ($p < 0.0001$)
