

Supplementary Figure S1. Digestion of different nucleopolyhedrovirus genomes. HearNPV-BJ, HzNPV, RoMNPV, HearNPV-C1 and AcMNPV were digested by the same restriction endonucleases: *NdeI*.

Supplementary Figure S2. Gene parity plots of HearNPV-BJ against other baculoviruses. HearNPV-C1, AcMNPV, SfMNPV and SpltNPV-II were selected for analysis respectively.
