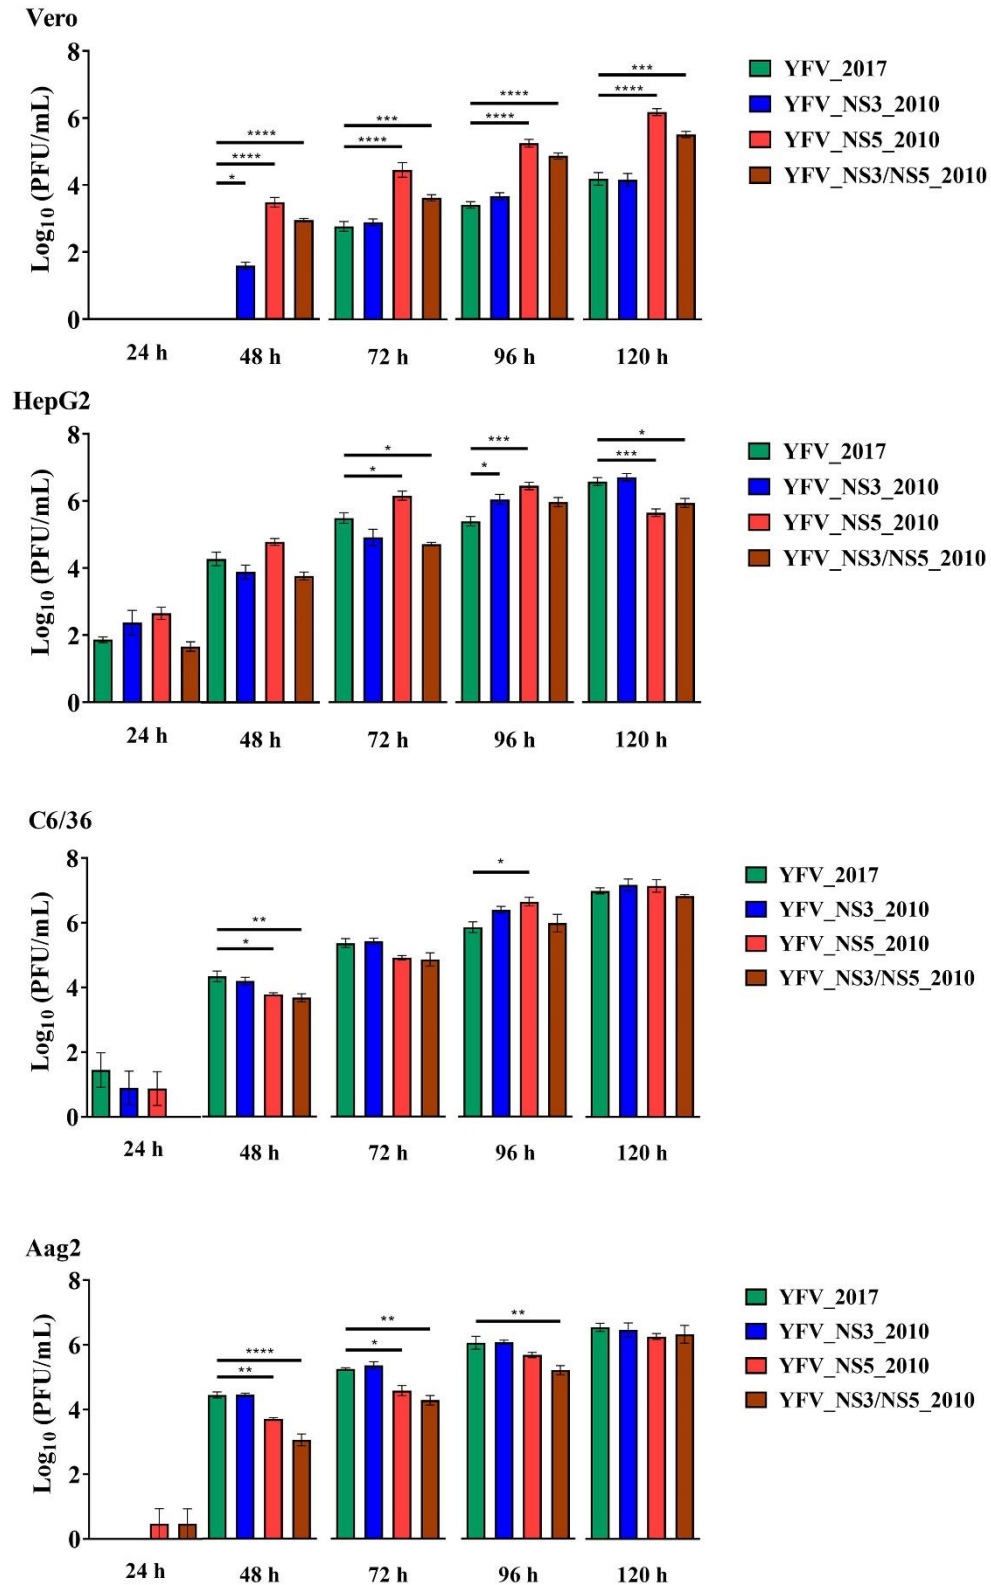

Figure S1. Statistical analysis of the viral replication kinetics in Vero (A), HepG2 (B), C6/36 (C) and Aag2 (D). Viral titers average of each YFV isolate were compared using One-way ANOVA with Dunnett's multiple comparisons test: * represents $p \leq 0.05$, ** represents $p \leq 0.01$, *** represents $p \leq 0.001$ and **** represents $p \leq 0.0001$.

Figure S2. Statistical analysis of IC₅₀ values generated after viral infection under treatment with IFN-I. The IC₅₀ values of each replicate were plotted in a column table and analyzed for statistical differences. The test applied was One-way ANOVA with Dunnett's multiple comparisons test: * represents $P \leq 0.05$, ** represents $P \leq 0.01$, *** represents $P \leq 0.001$ and **** represents $P \leq 0.0001$.

Table S2. Follow-up of viral RNA copies/mL in blood samples from infected AG129 mice

Inoculated virus	Mouse	Survival time (days)	Viremia in RNA copies/mL by day post-inoculation (d.p.i.)					
			2	4	6	7	8	16
YFV 2017	1	16	0.00	7.96×10^2	1.91×10^4	n.d.	7.35×10^3	7.28×10^1

	6	7	2.49×10^2	2.15×10^5	1.13×10^6	2.64×10^3	●	●

n.d.= non-determined viremia; ● = post-euthanasia period; * viremia peak

Average viremia at euthanasia for each YFV infected mice (RNA copies/mL):

Virus	Day post-inoculation	Viremia (RNA copies/mL)
YFV_2017	16	$4,19 \times 10^2$
	6	$1,69 \times 10^5$
YFV_NS3_2010	16	$5,32 \times 10^2$
YFV_NS5_2010	6	$2,11 \times 10^6$
	7	$3,74 \times 10^5$
YFV_NS3/NS5_2010	7	$2,66 \times 10^4$

Figure S3. Statistical analysis of viremia values of viral RNA copies/mL in blood samples from infected AG129 mice. The log₁₀ values of viral loads in the blood of AG129 mice were compared by One-way ANOVA with Dunnett's multiple comparisons test: * represents $P \leq 0.05$, ** represents $P \leq 0.01$.
