Supplemental Figures

Figure S1. SDS PAGE gels showing purified lysins, CBDs, and EADs. Proteins were loaded on NupAGE 4-12% BisTris gels and stained with Coomassie Blue. The expected molecular mass of each protein and the lane in which the purified protein was run in indicated in the boxes below the gels. Molecular weight markers are identified on the left. Please note that under boiling SDS conditions TurboRFP and TagRFP is known to fragment.

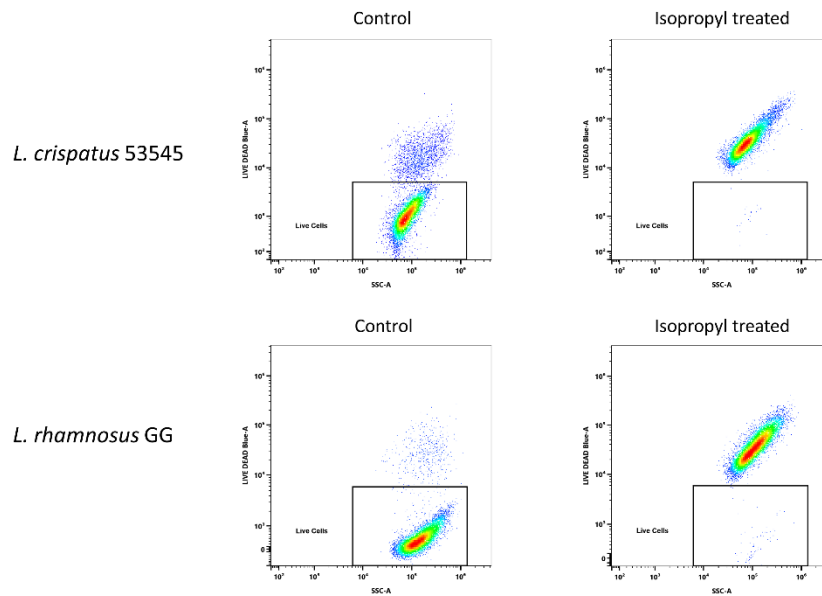

Figure S2. Use of SYTOX Blue Live/Dead stain to distinguish live from dead cells. SYTOX blue (ThermoFisher) is a cell impermeant nucleic acid stain that enters cells with damaged membranes and binds nucleic acids. (Top) untreated *L. crispatus* 53545 control (Left) and (Right) isopropyl alcohol treated cells (70%, 5 min). (Bottom) Untreated *L. rhamnosus* GG control (Left) and (Right) isopropyl alcohol treated cells.

Table S1. List of bacterial strains and plasmids used in this study

Bacterial Strains	Description	Source
<i>Lactobacillus gasseri</i> 19992		ATCC
<i>Lactobacillus gasseri</i> 9857		ATCC
<i>Lactobacillus gasseri</i> SJ-9E-US		BEI
<i>Lactobacillus gasseri</i> SV-16A-US		BEI
<i>Lactobacillus jensenii</i> 115-3-CHN		BEI
<i>Lactobacillus jensenii</i> 208-1		BEI
<i>Lactobacillus jensenii</i> SJ-7A-US		BEI
<i>Lactobacillus crispatus</i> 125-2-CHN		BEI
<i>Lactobacillus crispatus</i> 33197		ATCC
<i>Lactobacillus crispatus</i> 53545		ATCC
<i>Lactobacillus crispatus</i> MV-1A-US		BEI
<i>Lactiplantibacillus plantarum</i> 8014		ATCC
<i>Lactiplantibacillus plantarum</i> V	Product isolate	[1]
<i>Limosilactobacillus vaginalis</i> 49540		ATCC
<i>Lactocaseibacillus casei</i> 393		ATCC

<i>Enterococcus durans</i> RM62	Breast milk isolate, Identified by MALDI-TOF	This Study
<i>Limosilactobacillus reuteri</i> 53608		ATCC
<i>Limosilactobacillus reuteri</i> BAA-2837		ATCC
<i>Limosilactobacillus reuteri</i> CF-48-3A		BEI
<i>Lactocaseibacillus rhamnosus</i> GG		ATCC
<i>Lactocaseibacillus rhamnosus</i> LMS2-1		BEI
<i>Lactobacillus acidophilus</i> C	Product Isolate	[1]
<i>Lactobacillus acidophilus</i> V	Product Isolate	[1]
<i>Lactobacillus delbrueckii sub lactis</i> 15808		ATCC
<i>Lactococcus lactis</i> 11454		ATCC
<i>Lactobacillus johnsonii</i> 11506		ATCC
<i>Lactobacillus johnsonii</i> 135-1-CHN		BEI
<i>Escherichia coli</i> BL21		Novagen
Plasmids	Description	Source/ Accession Number
pSDL221	pET22b(+) containing 693bp fragment encoding TurboRFP cloned into XbaI and SacI	This study / OR372164
pSDL218	pET22b(+) containing 711bp fragment encoding TurboGFP cloned into XbaI and SacI	This study / OR372165
pRJD193	pET22b(+) containing 1298bp fragment that includes TurboRFP CL1 CBD gene fusion (AA 155-350)	This study / OR372166
pRJD198	pET22b(+) containing 1064bp fragment that includes TurboRFP jlb1 CBD gene fusion (AA 192-310)	This study / OR372167
pSLL166	pET22b(+) containing 1315bp fragment that includes TagRFP jlb1 CBD gene fusion (AA 192-310)	This study / OR372168
pRJD209	pET22b(+) containing 1052bp fragment that includes TurboRFP Lj965 CBD gene fusion (196-310)	This study / OR372169
pRJD201	pET22b(+) containing 1022bp fragment that includes TurboRFP LLh CBD gene fusion (AA 194-298)	This study / OR372170
pSLL160	pET22b(+) containing 1039bp fragment that includes TurboGFP LLh CBD gene fusion (AA 194-298)	This study / OR372172
pRJD202	pET22b(+) containing 1016bp fragment that includes TurboRFP phiJB CBD gene fusion (AA 192-294)	This study / OR372171
pRJD488	pET22b(+) containing 1050bp fragment that includes CL1 lysin coding sequence	This study / OR372173
pRJD489	pET22b(+) containing 629bp fragment including the CL1 EAD coding sequence (AA 1-205)	This study / OR372174

pRJD492	pET22b(+) containing 930bp fragment that includes Jlb1 lysin coding sequence	This study / OR372175
pRJD493	pET22b(+) containing 654bp fragment including the Jlb1 EAD coding sequence (AA 1-212)	This study / OR372176
pRJD490	pET22b(+) containing 882bp fragment that includes PhiJB lysin coding sequence	This study / OR372177
pRJD491	pET22b(+) containing 645bp fragment including the phiJB EAD coding sequence (AA 1-209)	This study / OR372178
