

## Supplementary Figure S1

**Figure S1.** Monthly detection rate of enteric viruses in pre and post-rotavirus vaccine introduction periods among diarrhoea cases before (2008-2012) and after (2016-2019) rotavirus vaccine introduction in Manhica District, Mozambique. **(A)** norovirus GI; **(B)** norovirus GII; **(C)** adenovirus 40/41; **(D)** astrovirus and **(E)** sapovirus. The Green dashed line indicates vaccine introduction time point in September 2015. There was no surveillance activity from 2013-2014.
