

Table S1. Primer pairs used to confirm presence of bean yellow mosaic virus (primer names beginning BYMV) and Ornithogalum mosaic virus (primer names beginning OrMV) by PCR. The primer names also contain information on the name of the genes to which they bind and whether they are forward (F) or reverse (R) primers.

Primer name	Primer sequence 5'>3'	Amplicon size
BYMVP3F BYMVCIR	GCAGCACTTGAGGGAGCTAA GTTGCGCATTAGCTCTCGTG	518 bp
