

Supplementary Figure S1: Gating Schemes for T98G Cells and NK Cells. A (Left-Right): Gate 1 (T98G cells) included all cells in the FSC-A versus SSC-A plot. Gate 2 (Single cells) excluded doublet cells using the FSC-H versus FSC-A plot. **B (Left-Right)** Gate 1 (Lymphocytes) included all lymphoid cells based on size and granularity using the FSC-A versus SSC-A plot. Gate 2 (Single cells) excluded doublet cells using the FSC-H versus FSC-A plot. Gate 3(NK cells) included only cells which were CD56⁺ and CD3⁻.
