Supplementary material

Table S1. Solvent test on the mycelial growth of the phytopathogenic fungi evaluated

Phytopatogen	Mycelial growth at 96 h.		
	H ₂ O	DMSO	MSD
FoC	32.08 ^a	31.58 ^a	1.77 ^a
FoT	33.50 ^a	36 ^a	3.32 ^a
FsC	32.83 ^a	32.75 ^a	3.91 ^a

Data are given in milímetros (mm). DMSO: Dimethyl Sulfoxide. FoC (*Fusarium oxysporum* A. comiteca), FoT (*Fusarium oxysporum* A. tequilana) and FSC (*Fusarium solani* A. comiteca). Latin letter (superscript) in the same column indicate significant differences. MSD (Minimum Significant Diference)
